Lemon-Aid New Cars and Trucks 2013 2022 Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian economy, worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Scooby-Doo? Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this guide.

You Suck at Racing Jul 06 2020 A lot of books on driving are written by professional racers who assume you too want to be a professional racer. This book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track racing. Succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient, nourishing.

Lemon-Aid New Cars and Trucks 2011 2022 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck book on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be careful of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota: enough apologies: "when you mess up, 'fess up."

Mopar Minivans ~~Nov 29~~ 2019 In the early 1970s, Chrysler started working on a "magic wagon" -- a completely new passenger van that would fit in a normal garage. It was a daring project for a company that was strapped for cash. This book taps the people who created the minivans, with unpublished photos of the original clay models. It is not just a story of a vehicle, but of the people who pushed it through the development process, brought it to life, and refreshed it in the face of intense competition. Engineers, planners, and designers started arguing over alternatives before the first van left the factory. This book dives into the reasons behind their decisions, and some of the ways minivans could have been different; it also covers electric and CNG minivans, engines and transmissions, concept cars, and the assembly plants. The paperback is generously illustrated with full-color design studies and photos of the final product; the Kindle version has fewer photos, but still covers the original clay models and the concepts. "It's incredibly rare when the auto industry creates an entirely new class of vehicle, and rarer still when that innovation is an instant success story, but such was the case with Chrysler and the development of the minivan. "In Mopar Minivans, Zatz uses the people who were involved to retell in vivid detail the largely forgotten story of how this innovative people mover evolved into a quintessential piece of American family life for several generations. It's a story that showcases not only how the automotive industry can work at its best, but also the ways that the industry's product groupthink mentality can stifle innovation." -- Larry Vellequette, Automotive News "I am amazed how complete you are, having not been on the front trenches during agreements, disagreements, and, yes, even skirmishes, at times." -- Chrysler employee David Zatz founded Chrysler-focused website allpar.com; he also holds a Ph.D. in social and organizational psychology from Columbia University, and has been a business consultant for 25 years.
