*The Impact of Globalization on Argentina and Chile* May 29 2022

During the first global economy of the late nineteenth century and early twentieth century, Argentina became one of the richest countries on earth, while Chile was an economic backwater. During the contemporary era of globalization, liberalization and institutional reforms in Chile provided a context in which business grew, while in Argentina, institutional dysfunction made productive business hard to sustain. This book explores the complex relationships between corporate behavior, institutions and economic growth through the contrasting experiences of Argentina and Chile. In nine chapters written by prominent business historians, the work addresses the role of business in these two eras of globalization, examining the impact of multinationals, the formation of business groups, and relations between business and governments. It places the regional experience within the context of the worldwide history of globalization.

**Item Interpretation of the Luria-Nebraska Neuropsychological Battery** May 17 2021

The Luria-Nebraska Neuropsychological Battery is a relatively new neurodiagnostic test, and there is a growing demand for material on the more advanced aspects of its interpretation. This book, organized around the theoretical meaning of items, the empirical correlations between items, and the factor structure of the individual scales, is a first response to that demand. It will serve to give greater understanding of the psychological skills that underlie each item on the Luria-Nebraska battery—an understanding prerequisite to the techniques of “syndrome analysis” described in the writings of A. R. Luria—and it will be particularly useful to those who have limited experience with actual case material. The major part of the book is an analysis of each Luria-Nebraska scale, either item by item or as a unit. For each scale the authors examine the theoretical intent of the items and the underlying skills according to Luria’s theory. They then present the results of item interrelations analysis to determine whether

the items tap common skills. Finally they describe the factor structure of the various scales, exploring the interrelations of items within each scale. In addition to analyzing the behavioral scales of the Luria-Nebraska battery, the book reviews a number of other empirical scales that further aid interpretation—particularly the experimental localization scales that tap focal deficits in specific areas of the brain. Also included are case histories that illustrate the process of diagnosis in patients who receive a series of Luria-Nebraska batteries over the course of their treatment. Finally, the authors briefly discuss subcortical disorders—an issue often ignored in clinical neuropsychological testing.

**Sport and Social Exclusion** Nov 30 2019 This book presents the first comprehensive review of factors leading to exclusion from participation in sport in the UK. Structured around key excluded groups, such as the elderly, ethnic minorities, the disabled and rural communities, the book offers an important assessment of sports policy in contemporary Britain, as well as a unique case study of policies to combat social exclusion under New Labour.

**The Big Book of Massey Tractors** Nov 03 2022 This is the first full-scale history of one of the largest farm tractor manufacturers of all time, peppered with pictures of Massey-Harris,

Ferguson, and Massey Ferguson's historic models, collectibles, sales memorabilia, and advertisements from old farm magazines. The Big Book of Massey Tractors tells the story of the mergers and machines that formed Massey Ferguson over several decades, and—because these machines dominated Canadian farms for almost a century—in many ways it also tells the story of Canadian agriculture. Robert Pripps, a longtime tractor aficionado, describes Massey Ferguson's battle with Ford over dominance of the farm tractor industry—a battle the company eventually won, remarkably enough, in view of its initial abject market failure with tractors. From the company's beginnings in 1891, to its 1953 merger with the Ferguson tractor company, to its current ownership by Allis-Gleaner Company (AGCO), Masseys have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.

*A Dam for Africa* Jun 29 2022 Since its construction in the early 1960s, the hydroelectric Akosombo Dam across the Volta River has exemplified the possibilities and challenges of development in Ghana. Drawing

upon a wealth of sources, *A Dam for Africa* investigates contrasting stories about how this dam has transformed a West African nation, while providing a model for other African countries. The massive Akosombo Dam is the keystone of the Volta River Project that includes a large manmade lake 250 miles long, the VALCO aluminum smelter, new cities and towns, a deep-sea harbor, and an electrical grid. On the local level, Akosombo has meant access to electricity for people in urban and industrial areas across southern Ghana. For others, Akosombo inflicted tremendous social and environmental costs. The dam altered the ecology of the Lower Volta, displaced 80,000 people in the Volta Basin, and affected the livelihoods of hundreds of thousands of Ghanaians. In *A Dam for Africa*, Stephan Miescher explores four intersecting narratives: Ghanaian debates and aspirations about modernization in the context of decolonization and Cold War; international efforts of the US aluminum industry to benefit from Akosombo through cheap electricity for their VALCO smelter; local stories of upheaval and devastation in resettlement towns; and a nation-wide quest toward electrification and energy justice during times of economic crises, droughts, and climate change.

**American Firms in Europe** Apr 27 2022 The processes of the Americanisation of Europe and the moves of American firms abroad have been already well studied. But the very expansion of

American firms in Europe still lacked a comprehensive survey. This book gathered two dozens of academics on an actual European level, which paves the way to comparisons, synthesised by leading business historian M. Wilkins. The breakthroughs achieved here concern the topics of timetable and rhythms of American FDIs in Europe, the patterns followed in each country, along with the specificities of each industry or service sector, and the strategy adopted by big firms. Beyond the facts, the immaterial aspects of this business history are scrutinised, especially about the perception of American firms by Europeans: firms' corporate image and identity were at stake. The Europeanisation of American firms is a key issue, about industrial relations, management. commercial policies. brand image, connections and embeddedness. The positions of public authorities and of (industrialists and trade unions') lobbies in front of such an American offensive are also gauged. Graphs and tables of figures provide numerous data. And a few chapters are accompanied by an overview of ads published by American affiliates in newsmagazines. to fuel analysis of their perception by consumers.
