The Integrated Case Management Manual Mar 26 2022 Thoroughly revised and updated since its initial publication in 2010, the second edition of this gold standard guide for case managers again helps readers enhance their ability to work with complex, multimorbid patients, to apply and document evidence-based assessments, and to advocate for improved quality and safe care for all patients. Much has happened since Integrated Case Management (ICM), now Value-Based Integrated Case Management (VB-ICM), was first introduced in the U.S. in 2010. The Integrated Case Management Manual: Valued-Based Assistance to Complex Medical and Behavioral Health Patients, 2nd Edition emphasizes the field has now moved from "complexity assessments" to "outcome achievement" for individuals/patients with health complexity. It also stresses that the next steps in VB-ICM must be to implement a standardized process, which documents, analyzes, and reports the impact of VB-ICM services in removing patient barriers to health improvement, enhancing quality and care coordination, and lowering the financial impact to patients, providers, and employer groups. Written by two expert case managers who have used VB-ICM in their large fully disseminated VB-ICM program and understand its practical deployment and use, the second edition also includes two authors with backgrounds as physician support personnel to case managers working with complex individuals. This edition builds on the consolidation of biopsychosocial and health system case management activities that were emphasized in the first edition. A must-have resource for anyone in the field, The Integrated Case Management Manual: Value-Based Assistance to Complex Medical and Behavioral Health Patients, 2nd Edition is an essential reference for not only case managers but all clinicians and allied personnel concerned with providing state-of-the-art, value-based integrated case management.

Removable Partial Prosthodontics Mar 02 2020 This work provides a case-oriented approach to treatment planning, bridging the gap between conventional textbooks of prosthodontics and basic manuals of denture design. It is divided into two parts. The first reviews basic principles of treatment planning and partial denture designs, and is supported by numerous line diagrams, checklists, questions and summaries which highlight key points. Part Two comprises 14 complete case histories, putting into practice the theory outlined in Part One. For each, the history leads to a series of possible treatment options, based on the patient's needs and the dentist's appraisal of their practicality. Each case is illustrated with casts of the patient's existing dentition, radiographs and results of other investigations such as sialography and CT scans. From these a treatment plan is devised and a denture constructed. In some of the cases, design errors' are also included for discussion.

CMSA's Integrated Case Management Jan 24 2022 Written by case managers for case managers, this reference manual for nurses and other health professionals presents a CMSA tested approach towards systematically integrating physical and mental health case management principles and assessment tools. Since the health care field has undergone major changes such as the passing of the Patient Protection and Affordable Care Act, Mental Health Parity, Transition of Care & Chronic Care Management and the Medicare Act and CHIP Authorization Act (MACRA), health care workers must competently know how to integrate those new regulations, describe alternative payment options, and implement requirements for

greater patient and family assessment, care planning, and care coordination in their practice. CMSA's Integrated Case Management delves into the role of the case manager and unpacks how case managers assess and treat complex patients. These are patients who may be challenged with medical and behavioral conditions, poor access to care services, as well as chronic illnesses and disabilities, and require multidisciplinary care to regain health and function. With a wealth of information on regulatory requirements, new models of care, integration of services, digital and telemedicine, and new performance measures that are clearly defined for nurses in nursing terminology, chapters outline the steps needed to begin, implement, and use the interventions of the Integrated Case Management approach. All content aligns with the newly revised 2017 Model Care Act, CMSA Standards of Practice 2016 as well as the CMSA Core Curriculum for Case Management Third Edition.

Children's Palliative Care: An International Case-Based Manual Aug 07 2020 This manual enables individuals working in children's palliative care (CPC) globally to learn through engaging real-world cases. The aim is to provide a clinical case-based resource that is globally relevant and accessible to those working in CPC. Drawing on case histories from around the world that reflect key issues and elements of CPC, it provides a practical approach grounded in experience. It addresses multidisciplinary care in the management of children and their families; discusses cases from an international perspective, and shares examples from a variety of countries, utilising cases across a range of ages and conditions, demonstrating holistic care. It represents the first case-based manual on global CPC and is endorsed and promoted by the International Children's Palliative Care Network (ICPCN). Children's palliative care is a rapidly developing field, both in the UK and internationally. The provision of CPC varies considerably, with provision often being insufficient, and over 65% of countries having no recognised CPC service provision whatsoever. As such, while there are an estimated 21.6 million children who require palliative care, in many areas of the world, CPC is poor or non-existent, and children are treated like little adults without their distinctive needs being recognised or understood. There is also a dearth of literature on CPC, hence this clinical case-based manual fills a gap in the market, and is aimed at a global audience, making it a unique text in the field.
