Cheese Problems Solved Mar 15 2021 Cheese is a unique food product which requires a significant amount of scientific knowledge to be produced successfully. However, due to the many, complex and interrelated changes which occur during cheese manufacture and ripening, it is still not possible to guarantee the production of premium quality cheese. Written by an international team of renowned contributors, Cheese problems solved provides responses to over 200 of the most frequently asked questions about cheese and the cheese-making process, in a unique and practical question-and-answer format. Opening chapters concentrate on queries regarding the preparation of cheese milk, the conversion of milk to curd, the ripening process,

pathogens, cheese analysis and nutritional aspects of cheese amongst other issues. The latter half of the book discusses particular types of cheeses such as Cheddar, Grana-type cheeses, Mozzarella, Dutch-type, Swiss and Blue cheeses, to name but a few. Edited by a leading expert and with contributions from specialists within the field, Cheese problems solved is an essential reference and problem solving manual for professionals and trainees in the cheese industry. Provides responses to over 200 of the most frequently asked questions about cheese and the cheese-making process An essential reference and problem solving manual for professionals and trainees in the cheese industry Benefit from the knowledge of leading specialists in the field

Our Kind Jun 17 2021 Writing with the same wit, humor, and style of his earlier bestsellers, noted anthropologist Marvin Harris traces our roots and views our destiny.

Applied equine nutrition Sep 01 2022 The content of this book gives scientifically validated practical hints or state of the art knowledge to veterinarians, breeders, riders and members of the feed industry on: - the nutrition of endurance horses; - the nutrition of growing horses to reduce prevalence of developmental orthopedic disease; - strategies to cope with exertional rhabdomyolysis; - and on the importance of nutrition for the maintenance and rehabilitation of health of teeth, hooves and the gastrointestinal tract without which a horse is no horse.

Equine Laminitis Aug 27 2019 The first book dedicated to this common, serious, and complex equine disease, Equine Laminitis is the gold-standard reference to the latest information on every aspect of the disease and its treatment. Provides the first book devoted specifically to equine laminitis Discusses the current state of knowledge on all aspects of the disease, including its history, relevant anatomical considerations, pathophysiology, the diagnostic workup, and clinical treatment Presents 50 chapters written by leading international experts, under the editorship of the foremost authority on equine laminitis Offers a thorough understanding of this common affliction, grounded in the scientific literature Describes effective prevention and treatment plans

Veteran Horse Herbal Nov 22 2021 A detailed guide to medicinal herbs and how they can help in the treatment of a wide range of common ailments that particularly affect older horses and ponies. Contents include herbal preparations and applications, veteran conditions and ailments, wounds and first aid, and dealing with the inevitable.

Journal of Cutaneous and Genito-urinary Diseases Sep 28 2019

Applied equine nutrition Nov 03 2022 The content of this book gives scientifically validated practical hints or state of the art knowledge to veterinarians, breeders, riders and members of the feed industry on:the nutrition of endurance horses;the nutrition of growing horses to reduce prevalence of developmental orthopedic disease;strategies to cope with exertional rhabdomyolysis; and on the importance of nutrition for the maintenance and rehabilitation of health of teeth, hooves and the gastrointestinal tract without which a horse is no horse.

Biomaterials and Applications Jun 05 2020 Volume is indexed by Thomson

Reuters CPCI-S (WoS). These proceedings bring together the invited and contributed articles presented at Chiang Mai International Conference on Biomaterials & Applications (CMICBA 2011). The main emphasis of the conference was placed on (a) biomaterials science and related disciplines, including mathematics, physics, biology and chemistry, in conjunction with (b) applications of biomaterials in areas such as life sciences, cosmetics, agriculture and the environment.

Applied equine nutrition and training Oct 02 2022 This book describes recent developments on equine nutrition and rehabilitation. Experts provide reviews on feeding horses with roughage only and with medicinal plants, as well as insight in the potential importance of monitoring the urine of horses for mycotoxins. Information on the effect of supplementing the diet of horses with dimethylglycine and aleurone complement the nutritive information. Moreover, overviews are given on managing the whole horse instead of the lesioned tissues only and inform on a new tool to monitor the effect of measures taken. In addition, there is very specific information on the effect of training horses included. The book will be of interest to those working in the field of equine sports nutrition, science and medicine.

Applied equine nutrition and training Jul 31 2022 The content of this book arises from the Equine NUTrition COncference - Practice (ENUCO) 2007. The purpose of the conference is to supply scientifically validated practical hints and state of the art knowledge on equine nutrition and training. The topics dealt with in this publication are: - News on equine nutrition, training and medicine (2005-06). - Noteworthy changes to the Horse Nutrition Requirements by the National Research Council of USA. - Relevance and standardization of the terms Glycaemic Index and Glycaemic Response. - The role of nutrition in colic. - The use of herbs in the management of hyperadrenocorticism and other hormonal diseases of horses. - Diagnosis and management of insulin resistance and equine metabolic syndrome (EMS) in horses. - Food-allergy in horses.

Equine Applied and Clinical Nutrition E-Book Sep 08 2020 Equine Applied and Clinical Nutrition is a comprehensive text resource on the nutrition and feeding management of horses. Over 20 experts from around the world share their wisdom on a topic of central relevance to all equine practitioners and the equine community generally. Both basic and applied (including healthy and diseased animals) nutrition and feeding management of horses and other equids (i.e. ponies, donkeys, wild equids) are covered. The book will appeal to a wide audience: undergraduate and post-graduate students in equine science and veterinary medicine, veterinarians, equine nutritionists, horse trainers and owners. The clinical component will strengthen the appeal for equine veterinarians. Equine Applied and Clinical Nutrition will be a "must have" for anyone involved in the care of horses, ponies and other equids. The book is divided into 3 parts: Basic or core nutrition in this context refers to digestive physiology of the horse and the principles of nutrition. Applied nutrition deals with the particular types of foods, and how to maintain an optimum diet through various life stages of the horse. You might characterize this aspect as prevention of disease through diet. Clinical nutrition covers various diseases induced by poor diet, and their dietary treatment and management. It also looks at specific feeding regimes useful in cases disease not specifically induced by diet. Authoritative,

international contributions Strong coverage of clinical aspects either omitted from or only sparsely dealt with elsewhere Full colour throughout The only clinical equine nutrition book

The Forbidden Aug 08 2020 Benito Pérez Galdós, considered Spain's most important novelist after Cervantes, wrote 77 novels, several works of theater and a number of other tomes during his lifetime (1843–1920). His works have been translated into all major languages of the world, and many of his most highly regarded novels, those of the contemporary period, have been translated into English two, three and even four times over. Of the few "contemporary novels" of Galdós that until now have not come to light in English, *The Forbidden* is certainly among the most noteworthy. The story line concerns a wealthy philanderer, José María Bueno de Guzmán, who attempts to buy the favors of his three beautiful married cousins. He is successful with the first, Eloísa, a grasping materialist who falls deeply in love with him. Then he rejects her in order to attempt to seduce the youngest, Camila. Meanwhile, the third, the pseudo-intellectual María Juana, jealous, seduces José María. But it is Camila, healthy, impetuous and wild, who resists his temptations and holds our attention. The novelist and critic Leopoldo Alas, Galdós's contemporary, calls her "the most feminine, graceful, lively female character that any modern novelist has painted." As a naturalistic study, in the manner of Balzac in particular, principal characters of Galdós's other novels (*El doctor Centeno*, *La de Bringas*, *La familia de León Roch*) become fleetingly visible in *The Forbidden*. In addition, the entire Bueno de Guzmán family gives evidence of the naturalistic emphasis on heredity: they all display certain physical or mental disorders. Eloísa has a morbid fear of feathers, María Juana often feels that she has a tiny piece of cloth caught in her teeth, José María suffers bouts of depression, an uncle is a kleptomaniac, one of the relatives writes letters to himself, etc. At the same time, this novel shows the foibles of Spanish society where status is determined by one's associates, by the wearing of finery, and by living on borrowed money. In their history of Spanish literature, Chandler and Schwartz call Galdós "the greatest novelist of the nineteenth century and the only one who deserves to be mentioned in the same breath with great novelists like Balzac, Dickens and Dostoevsky." *The Forbidden*, written at the height of the author's creative powers, is a major work and its publication for an English-speaking audience is long overdue.

Etruscans Nov 30 2019 In the early days of the Roman Empire, the noble Etruscan civilization in Italy is waning, Vesi, a young Etruscan noblewoman, is violated by a renegade supernatural being. Outcast then from Etruria, Vesi bears Horatrim, a child who carries inexplicable knowledge and grows to manhood in only six years. But a savage Roman attack leaves Vesi unresponsive and Horatrim homeless and vulnerable, and he travels to Rome where his talents confound powerful businessman Propertius, who arranges to adopt Horatrim as a son, changing his name to Horatius. And all the while his demon father is seeking him to kill him, for Horatius is a conduit through which the demon might be found and destroyed. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Diccionario Inglés de la Universidad de Chicago Sep 20 2021 Incorporating

new words and meanings from both languages, the fifth edition of this well-received Spanish dictionary offers speakers of both Spanish and English a valuable bilingual resource for navigating these languages. (Reference)

The Routledge Spanish Bilingual Dictionary of Psychology and Psychiatry Aug 20 2021 The Routledge Spanish Bilingual Dictionary of Psychology and Psychiatry contains over 100,000 entries making this the most comprehensive and up-to-date dictionary of its kind. The Dictionary provides concise, comprehensive and current coverage of every word or phrase used in the study and practice of psychiatry and psychology. This valuable reference tool covers all disciplines and sub-disciplines, both research-based and clinical. This is a vital resource to those in the healthcare professions, to academicians and to those who work in translation and/or interpretation, healthcare and the law who are in contact with the English and Spanish speaking communities.

Spanish-English Bilingual Visual Dictionary Apr 03 2020 Organized by such common subjects as Home, Work, Eating Out, Transportation, Health and Sports, these bilingual visual dictionaries give students and business people quick access to foreign terms in the simplest and most intuitive way.

Advances in Equine Nutrition III Jun 25 2019 Featuring international authorities that presented at KER conferences, this comprehensive collection of research and review papers discusses such topics as refined nutritional requirements for horses, effective ways to deliver nutrients for horses in all athletic endeavors, achieving optimal growth in young horses, and ensuring nutrient requirements are being fulfilled in reproductively active horses.

The Trotula Jan 25 2022 The Trotula was the most influential compendium on women's medicine in medieval Europe. Scholarly debate has long focused on the traditional attribution of the work to the mysterious Trotula, said to have been the first female professor of medicine in eleventh- or twelfth-century Salerno, just south of Naples, then the leading center of medical learning in Europe. Yet as Monica H. Green reveals in her introduction to this first edition of the Latin text since the sixteenth century, and the first English translation of the book ever based upon a medieval form of the text, the Trotula is not a single treatise but an ensemble of three independent works, each by a different author. To varying degrees, these three works reflect the synthesis of indigenous practices of southern Italians with the new theories, practices, and medicinal substances coming out of the Arabic world. Arguing that these texts can be understood only within the intellectual and social context that produced them, Green analyzes them against the background of historical gynecological literature as well as current knowledge about women's lives in twelfth-century southern Italy. She examines the history and composition of the three works and introduces the reader to the medical culture of medieval Salerno from which they emerged. Among her findings is that the second of the three texts, "On the Treatments for Women," does derive from the work of a Salernitan woman healer named Trota. However, the other two texts—"On the Conditions of Women" and "On Women's Cosmetics"—are probably of male authorship, a fact indicating the complex gender relations surrounding the production and use of knowledge about the female body. Through an exhaustive study of the extant manuscripts of the Trotula, Green presents a critical edition of the

so-called standardized Trotula ensemble, a composite form of the texts that was produced in the mid-thirteenth century and circulated widely in learned circles. The facing-page complete English translation makes the work accessible to a broad audience of readers interested in medieval history, women's studies, and premodern systems of medical thought and practice.

WAAP Book of the Year ... Feb 23 2022

Male & Female Circumcision Jul 19 2021 "Originally published in Arabic and also translated into French, Dr. Aldeeb now makes his landmark study of male and female circumcision available to an English speaking audience. Dr. Aldeeb is an advocate in the Swiss Institute of Comparative Law and a leading figure in human rights issues. This major work explores the issues of circumcision in Judaism, Christianity, and Islam from religious, legal, medical, and social perspectives. It serves as both a major reference work for the subject and a monumental statement of human rights."

Twenty Years in Siberia Jul 27 2019

Adventures in Being Dec 12 2020 Using 22 case histories, the author shows how we can cut ourselves loose from the dead fingers of the past. Through existential realism we are taught to look again at the circumstances of our lives; live in the present without always glancing back to the past or forward to the future; and appreciate the uniqueness of our being. Available Now.

A Modern Horse Herbal Jul 07 2020 This detailed guide to medicinal herbs for horses shows how they can help in the treatment of a wide range of common ailments, written for the new generation of horse owners seeking a more natural approach to their horse's health. Providing an A-Z of common ailments and conditions, from allergies to wounds, as well as depicting how one can safely and effectively treat these ailments with herbal medicine. In doing so, it draws on the latest research in herbal medicine as well as traditional plant-based remedies; it is full of tried and tested advice. Throughout, the author underlines the importance of veterinary consultation, and explains how certain herbs can be used to complement and support conventional treatments.

Never Coming Back Mar 03 2020 A harrowing and unforgettable thriller that has taken Sweden and Britain by storm—a twisted plot of revenge and tragedy by a writer whose edgy and gritty style evokes Henning Mankell and Hakan Nesser. Mike Zetterberg lives with his wife Ylva and their daughter in a house just outside Helsingborg in Sweden. One evening, Ylva don't come home as expected. Mike passes it off as a drink with a work friend, but when she's still missing the next day, he starts to worry. As Mike battles suspicion from the police and his own despair, he is unaware that Ylva is still alive, just a stone's throw from his own home. Ylva has been drawn into a twisted plot of revenge and tragedy that leads back into her and her abductors' shared past. Given the sudden and mysterious circumstances of her disappearance, Mike becomes the chief suspect. But what no one knows is that she's being held hostage in the cellar of the house across the street. A secret camera has been set up in her own home and Ylva can only watch her family on the screen. They cannot see her – and they most certainly cannot hear her scream... Hans Koppel's tale of horrific tragedy and brutal revenge has obsessed readers across Scandinavia for the past year, now in English for the first time.

Nutrition of the exercising horse Apr 27 2022 The exercising horse competes at various levels in different disciplines and is also increasingly used for leisure riding and driving as well as hobby farming and agritourism. This varied use of the horse of today creates challenges for those who are responsible for the feeding of horses, as well as to feed producers and manufacturers. This book provides an outstanding synthesis of knowledge in physiology and metabolism, nutritional requirements and feeding strategies. Use of performance aids and the question of feed contaminants and doping are explained and discussed according to EU legislation on the marketing and use of animal feeds and doping rules in horse sports. The improved knowledge and understanding of the background of the horse's performance and nutritional physiology helps to meet the nutritional requirements of working (or exercising) horses such that their genetic potential can be used properly. This book discusses the following seven subjects: -nutrients and tissue metabolism; -adaptations; -energy requirements; -protein requirements; -mineral, electrolytes and vitamins requirements and function; -feeding strategies; -performance aids and feed contaminants and doping. This book is the fourth step of further discussion on the evaluation and prediction of the requirements of different types of horses covered in the scope of the working group Nutrition of the Horse commission at European Association of Animal Production (EAAP). All those concerned by racing, riding and feeding in equine industry will enjoy this valuable resource. It is a reference book for scientists, veterinarians, advisers and practitioners in the equine industry, as well as for teachers and students in equine science.

Utopia for Realists May 17 2021 Universal basic income. A 15-hour workweek. Open borders. Does it sound too good to be true? One of Europe's leading young thinkers shows how we can build an ideal world today. "A more politically radical Malcolm Gladwell." --New York Times After working all day at jobs we often dislike, we buy things we don't need. Rutger Bregman, a Dutch historian, reminds us it needn't be this way-and in some places it isn't. Rutger Bregman's TED Talk about universal basic income seemed impossibly radical when he delivered it in 2014. A quarter of a million views later, the subject of that video is being seriously considered by leading economists and government leaders the world over. It's just one of the many utopian ideas that Bregman proves is possible today. Utopia for Realists is one of those rare books that takes you by surprise and challenges what you think can happen. From a Canadian city that once completely eradicated poverty, to Richard Nixon's near implementation of a basic income for millions of Americans, Bregman takes us on a journey through history, and beyond the traditional left-right divides, as he champions ideas whose time have come. Every progressive milestone of civilization-from the end of slavery to the beginning of democracy-was once considered a utopian fantasy. Bregman's book, both challenging and bracing, demonstrates that new utopian ideas, like the elimination of poverty and the creation of the fifteen-hour workweek, can become a reality in our lifetime. Being unrealistic and unreasonable can in fact make the impossible inevitable, and it is the only way to build the ideal world.

Emerging Equine Science Oct 10 2020 The importance of the equine industry to the rural economy is now beginning to be recognised. Because the horse is

not treated as an agricultural animal, little money has been put into research. Nevertheless, many organizations have been increasing research activities, and this book pulls together the results of recent thinking.

Animal production and animal science worldwide May 29 2022 In this third volume of the successful Book of the Year series, produced by the World Association for Animal Production (WAAP) specialists in animal science inform you about the developments in the past year in livestock systems worldwide. The best authors available are chosen to express their competence and expertise on all the aspects considered relevant in each specific field of animal science. This volume, like its predecessors, is based on four sections. The first describes livestock industry and relative research developments in the geographical continents. The second includes efforts to describe the development of research in every discipline within the large ambit of animal science. The third section contains interesting articles on 'free subjects', of large interest for readers such as 'Science and Policy in Risk Assessment of Transgenic Animals', 'The impact of nano-scale technologies in animal management', 'New developments in amino acid research', etc. The last section presents detailed statistics of high relevance in animal industry. This book is generally recognized as one of the very few practical resources of comprehensive statistical information related to animal industry. The Book of the Year series is intended for libraries that wish to offer their readers high-quality, updated information. At the same time, this series is an indispensable resource for scientists, policy makers and scientific writers who wish to enhance their proficiency in their field. It provides a very current, complete picture of the animal industry and livestock science worldwide.

Manual of Equine Lameness Jan 13 2021 Manual of Equine Lameness provides essential information on equine lameness diagnostics and treatment in an easy-to-use format ideal for the clinical setting. A clinically relevant distillation of topics from Adams and Stashak's Lameness in Horses, this text offers a quick introduction and fast access to key information. An accompanying DVD includes practical supplements, including additional anatomical images, video clips demonstrating key procedures such as perineural and intrasynovial injections, and examples of lameness conditions in motion. Designed for use in daily practice, the book is presented in brief chapters carefully formatted to maximize the usefulness for practicing veterinarians. Manual of Equine Lameness is an invaluable resource to any veterinarian treating lameness in horses and an ideal reference for veterinary students wanting to learn the fundamentals of lameness.

Equine Exercise Physiology May 05 2020 'Equine Exercise Physiology' provides up-to-date coverage of the basic sciences required for an understanding of the physiology of the equine athlete.

Zoo Animal Nutrition Apr 15 2021

The acute poorly performing sport horse Jun 29 2022 The determination and management of performance-limitation in sport horses is very challenging, especially within a short time period before an important competition. In this book experts disclose their experience on: -What do we know about the poor performance horse? -The gastrointestinal tract: medical, nutritional and surgical considerations. -Could it be the heart? -Could it be the muscles? -Monitoring orthopaedic health in competition horses. -Could it be

the foot? -Could it be neurological? -Cases where physiotherapy helped to make a difference. -Could it be respiratory?

Tackling Bullying in Your School Jan 01 2020 This comprehensive collection of essays provides a series of highly practical guidelines which schools can implement themselves. Step-by-step advice is given on developing a whole-school policy which is generally seen as the essential nucleus of effective action. The book also suggests methods for tackling bullying through classroom and curriculum activities, including video, drama, and the use of quality circles and of working with pupils involved in bullying situations. Emphasis is placed on assertiveness training for pupils who may be bullied, and non-punitive work with pupils who bully others. As the majority of bullying takes place in playgrounds, the book includes innovative sections on training lunchtime supervisors, enhancing playground activities, and improving the playground environment.

Farmers Club Journal Nov 10 2020

Biomedical Visualisation Feb 11 2021 This edited book explores the use of technology to enable us to visualise the life sciences in a more meaningful and engaging way. It will enable those interested in visualisation techniques to gain a better understanding of the applications that can be used in visualisation, imaging and analysis, education, engagement and training. The reader will be able to explore the utilisation of technologies from a number of fields to enable an engaging and meaningful visual representation of the biomedical sciences, with a focus in this volume related to anatomy, and clinically applied scenarios. The first eight chapters examine a variety of tools, techniques, methodologies and technologies which can be utilised to visualise and understand biological and medical data. This includes web-based 3D visualisation, ultrasound, virtual and augmented reality as well as functional connectivity magnetic resonance imaging, storyboarding and a variety of stereoscopic and 2D-3D transitions in learning. The final two chapters examine the pedagogy behind digital techniques and tools from social media to online distance learning techniques.

Jacques-Laurent Agasse, 1767-1849 Jan 31 2020
