Evaluating Achievement of Senior High School Students in Canada Jul 20 2021 In Canada today there is a clear move toward a more outcomes-based education system. This report examines the state of high school student assessment and reviews standards and accountability strategies. It reports on the policies, programs, and initiatives in all provincial ministries or departments of education and a sample of school boards across the country. Data were derived from a telephone survey of departmental/ministerial representatives from all 10 provinces and the 2 territories and from a questionnaire that was mailed to 279 school boards. A total of 140 boards responded, a 50 percent response rate. Data show that both boards and ministries are putting more emphasis on the development of comprehensive policies to cover all aspects of student evaluation. There is some movement away from relying on paper-and-pencil testing as the sole means of evaluation; the use of more authentic, performance-based approaches and a greater variety of assessment techniques are being promoted. Some of the best practices in high school evaluation involve use of a broad range of assessment methods; introduction of or improvements to provincial examinations; greater use of summative and formative evaluations; greater emphasis on modifying evaluation for special-needs students; use of performance-based assessment; and more reporting to parents and the public. Thirteen tables are included. Appendices contain copies of the two questionnaires and selected school board material. (Contains 19 references.) (LMI)

Students' Accuracy in Written English Under the Impression of the new "G8" System - a Case Study May 06 2020 Inhaltsangabe:Introduction: In Germany, education matters lie within the scope of each of the 16 German federal states. Consequently, there is no unique educational system which is valid for the entire Federal Republic of Germany, but 16 individual ones. However, a German-wide basic framework, including regulations about the compulsory school attendance for instance, does exist. The duration of compulsory schooling until passing the Abitur at the Gymnasium, however, is not regulated by this framework, but belongs to the power of decision of each federal state. For instance, in Thuringia and Saxony, the duration of compulsory schooling at the Gymnasium has been limited to eight years, as it was already the case before the reunification of Germany in 1990. In the other federal states, like North-Rhine Westphalia for example, the duration of compulsory schooling at the Gymnasium included an additional ninth year, resulting in the fact that the students attended the Gymnasium from grade 5 until grade 13. Nevertheless, in 2001, the ministry of education of the federal state Saarland decided for a reduction of the duration of compulsory schooling at the Gymnasium by one year. By now, all the other federal states have followed and therefore also made the decision for a reduced duration of only eight years at the Gymnasium. After many heated discussions, also the North-Rhine Westphalian ministry of education decided for a reduction of the duration of compulsory schooling at the Gymnasium. As a consequence of this decision, students of two grades (G8 and G9 students) entered the upper secondary level at all North-Rhine Westphalian Gymnasien on August 31st, 2010 (Ministerium für Schule und Weiterbildung des Landes Nordrhein-Westfalen, n.d.a). The students of this so-called Doppeljahrgang will all graduate in 2013 and therefore all of them will have to pass the same Abitur exams. Hence, it must be guaranteed that G8 students have the same preconditions as G9 students, despite having one year less of general schooling before graduating. Since no students have entered the upper secondary level after only five years at the Gymnasium in North-Rhine Westphalia before 2010, empirical research in this area is hardly available by now. Nevertheless, this Doppeljahrgang offers the unique chance of directly comparing G8 and G9 students in order to find out in how far the new G8 system was implemented successfully or not. Especially in the context of learning [...]

It shows how the persistence of inequality amid general economic growth is leaving some extremely poor children behind, despite the promises of the Millennium Development Goals.

Teaching Mathematical Modelling: Connecting to Research and Practice Sep 29 2019 This book provides readers with an overview of recent international research and developments in the teaching and learning of modelling and applications from a variety of theoretical and practical perspectives. There is a strong focus on pedagogical issues for teaching and learning of modelling as well as research into teaching and practice. The teaching of applications of mathematics and mathematical modelling from the early years through primary and secondary school and at tertiary level is rising in prominence in many parts of the world commensurate with an ever-increasing usage of mathematics in business, the environment, industry and everyday life. The authors are all members of the International Community of Teachers of Mathematical Modelling and Applications and important researchers in mathematics education and mathematics. The book will be of interest to teachers, practitioners and researchers in universities, polytechnics, teacher education, curriculum and policy.?

Kyrgyzstan Feb 12 2021 This handbook provides statistics on international trade in commodities for developing and industrial countries worldwide. It gives detailed time series for primary commodity prices that are a vital part of international trade. Commodity price trends are reviewed for 1987-91. Researchers will learn which years--and commodities--experienced booms or slumps. The report summarizes the activities of individual commodity groups and supplies exhaustive statistical tables in key trade categories. Some tables give external trade values for broad groups--by economic region--over the last two decades. They present data for trade volume, value, unit value, and terms of trade. Others contain time series on the direction of trade by economic regions. Data from earlier years is revised to reflect changes in country coverage. Additional tables provide country profiles on the primary commodity exports of low- and middle-income countries (LMICs). These statistics reflect the three-year period 1985-87, and include each country's share in world exports. The manual presents export and import data by commodity. These data cover LMICs and high-income countries and give the direction of trade by commodity for the high-income group for 1985-87. General price indexes that can be used as a measure of inflation are also shown. They detail the purchasing power derived from primary commodities exported by the developing economies. They give detailed data on commodities that range from foods to raw materials to petroleum products. The handbook also supplies market quotations for fifty-five commodities for 1950-91.

Extending Intelligence Aug 28 2019 This volume presents research from a variety of perspectives on the enhancement of human intelligence. It is organized around five themes - enhancement via instruction; enhancement via development (over the life cycle); enhancement over time; enhancement via new constructs; and new directions in enhancement. Three key issues are addressed: First, although most of the scientific research on intelligence has concerned what it is, this volume attends to the consequential societal and economic issue concerns of whether it can be increased, and how. Second, intellectual enhancement is particularly important when targeted to minorities and the poor, groups that have typically performed relatively less well on intelligence and achievement measures. This volume reflects the education community's ongoing interest in understanding, and attempting to close, achievement or test score gaps. Third, most of the attention to examining intellectual enhancement, and in accounting for and closing the test-score gap, has focused on general cognitive ability. In line with the current emphasis on considering intelligence from a wider perspective, this volume includes constructs such as emotional and practical intelligence in definitions of intellectual functioning. Extending Intelligence: Enhancement and New Constructs is an essential volume for researchers, students, and professionals in the fields of educational psychology, intelligence, educational measurement and assessment, and critical thinking.
