Brean Down Jun 26 2019 Excavations made necessary by coastal erosion have revealed probably the best preserved Bronze Age settlement sequence in Southern Britain. Five metres of deposits contained five prehistoric occupation phases separated by blown sand and eroded soil. The two lowest horizons, containing Beaker pottery, were followed by a layer with biconical urns and an oval stone structure; then came a rich middle Bronze Age layer with two round houses superseded by a late Bronze Age midden type deposit which produced two gold bracelets. At the top was a sub-Roman cemetery. The Bronze Age layers contained an abundance of pottery and other artefacts, including fired clay objects which represent one of the earliest salt extraction sites in Atlantic Europe. Environmental evidence was also prolific and contributions are included on soil thin sections, chemistry, magnetic properties, pollen, diatoms, ostracods, charred plant remains, animal bones, coprolites, and molluscs. The site seems to have been an island in the Bronze Age, with a considerable expanse of infrequently inundated saltmarsh to its south. The causes of the alternating sequence of sand deposition and stabilisation are considered in the context of environmental change generally in the Severn Estuary and the Somerset Levels.

Lord of the Flies Dec 01 2019 Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a

plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Feeding Strategies to Improve Sustainability and Welfare in Animal Production Sep 09 2020 This book contains the scientific contributions published within the Animals topical collection "Feeding Strategies to Improve Sustainability and Welfare in Animal Production". Originally a Special Issue, it has turned into a permanent collection, with its first article being published in July 2019 and more than 30 published articles a year later: evidence of the great interest from the scientific community

regarding the topics addressed. The articles, which are grouped by species (poultry, ruminants, pigs, etc.) and by topic, deal with a wide range of arguments that, first of all, highlight the extraordinary complexity and diversity that exists in the animal production sector, and then, the great influence that nutrition and feeding can have in terms of optimizing the use of environmental resources and improving the welfare of farmed animals. In addition, all this is closely connected with the urgent need to safeguard the resources of the planet on which we live.

The Shape of Inner Space Apr 04 2020 String theory says we live in a ten-dimensional universe, but that only four are accessible to our everyday senses. According to theorists, the missing six are curled up in bizarre structures known as Calabi-Yau manifolds. In The Shape of Inner Space, Shing-Tung Yau, the man who mathematically proved that these manifolds exist, argues that not only is geometry fundamental to string theory, it is also fundamental to the very nature of our universe. Time and again, where Yau has gone, physics has followed. Now for the first time, readers will follow Yau's penetrating thinking on where we've been, and where mathematics will take us next. A fascinating exploration of a world we are only just beginning to grasp, The Shape of Inner Space will change the way we consider the universe on both its grandest and smallest scales.

House of Leaves Jun 06 2020 “A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious.” —The New York Times Years ago, when House of Leaves was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.
