**International Political Sociology** Sep 27 2019 This book presents an overview and evaluation of contemporary research in international political sociology (IPS). Bringing together leading scholars from many disciplines and diverse geographical backgrounds, it provides unprecedented coverage of the key concepts and research through which IPS has opened up new ways of thinking about international relations. It also considers some of the consequences of such

innovations for established forms of social and political analysis. It thus takes the reader on an intellectual journey engaging with questions about boundaries and limits among the many interrelated worlds in which we now live, the ways we conceptualise them, and how we continually reshape boundaries of identities, spaces, authorities and disciplinary knowledge. The volume is organized three sections: Lines, Intersections and Directions. The first section examines some influences that led to the formation of the project of IPS and how it has opened up avenues of research beyond the limits of an international relations discipline shaped within political science. The second section explores some key concepts as well as a series of heated discussions about power and authority, practices and governmentality, performativity and reflexivity. The third section explores some of the transversal topics of research that have been pursued within IPS, including inequality, migration, citizenship, the effect of technology on practices of security, the role of experts and expertise, data-driven surveillance, and the relation between mobility, power and inequality. This book will be an essential source of reference for students and across the social sciences.

**Rage** Oct 01 2022 From New York Times Bestselling author (creator of the Netflix series *V Wars*), Jonathan Maberry comes the first in a brand new series featuring Joe Ledger and Rogue Team International. A small island off the coast of Korea is torn apart by a bioweapon that drives everyone—men, women, and children—insane with murderous rage. The people behind the attack want Korea reunified or destroyed. No middle ground. No mercy. Soon Japan, China, and the United States are pushed to the brink of war, while terrorists threaten to release the rage bioweapon in a way of pure destructive slaughter. Joe Ledger leads his newly formed band of international troubleshooters in their first mission to stop the terror cell, fighting alongside agents from North and South Korea. With the lives of billions at stake, Ledger is willing to bring his own brand of terror to this frightening new war.

**International Practices** May 16 2021 It is in and through practices - deeds that embody shared intersubjective knowledge - that social life is organized, that subjectivities are constituted and that history unfolds. One can think of dozens of different practices (from balancing, to banking or networking) which constitute the social fabric of world politics. This book brings together leading scholars in fields from international law and humanitarianism to nuclear deterrence and the UN to provide effective new tools to understand a range of pressing issues of the era of globalization. As an entry point to the study of world politics, the concept of practice accommodates a variety of perspectives in a coherent yet flexible fashion and opens the door to much needed interdisciplinary research in international relations. *International Practices* crystallizes the authors' past research on international practices into a common effort to turn the study of practice into a novel research program in international relations.

*Reasoning of State* Jun 24 2019 Scholars and citizens tend to assume that rationality guides the decision-making of our leaders. Brian C. Rathbun suggests, however, that if we understand rationality to be a cognitive style premised on a commitment to objectivity and active deliberation, rational leaders are in fact the exception not the norm. Using a unique combination of methods including laboratory bargaining experiments, archival-based case studies, quantitative textual analysis and high-level interviews, Rathbun questions some of the basic assumptions about rationality and leadership, with profound implications for the field of international relations. Case studies of Bismarck and Richelieu show that the rationality of realists makes them rare. An examination of Churchill and Reagan, romantics in international politics who sought to overcome obstacles in their path through force of will and personal agency, show what less rationality looks like in foreign policy making.

**Making Human Dignity Central to International Human Rights Law** Jan 24 2022 In recent years, there has been an explosion of writing on the topic of human dignity across a plethora of different academic disciplines. Despite this explosion of interest, there is one group – critical legal scholars – that has devoted little if any attention to human dignity. This book argues that these scholars should attend to human dignity, a concept rich enough to support a whole range of progressive ambitions, particularly in the field of international law. It synthesizes certain liberal arguments about the good of self-authorship with the critical legal philosophy of Roberto Unger and the capabilities approach to agency of Amartya Sen, to formulate a unique conception of human dignity. The author argues how human dignity flows from an individual's capacity for self-authorship as defined by the set of expressive capabilities s/he possesses, and the book demonstrates how this conception can enrich our understanding of international human rights law by making the amplification of human dignity its fundamental orientation.

Global Change and Terrestrial Ecosystems Dec 11 2020 Describes current state-of-the-science for predicting the effects of global change on ecosystems.

Handbook of Transportation Science Feb 22 2022 Over the past thirty-five years, a substantial amount of theoretical and empirical scholarly research has been developed across the discipline domains of Transportation. This research has been synthesized into a systematic handbook that examines the scientific concepts, methods, and principles of this growing and evolving field. The Handbook of Transportation Science outlines the field of transportation as a scientific discipline that transcends transportation technology and methods. Whether by car, truck, airplane - or by a mode of transportation that has not yet been conceived - transportation obeys fundamental properties. The science of transportation defines these properties, and demonstrates how our knowledge of one mode of transportation can be used to explain the behavior of another. Transportation scientists are motivated by the desire to explain spatial interactions that result in movement of people or objects from place to place. Its methodologies draw from physics, operations research, probability and control theory.

*Internationalization of Business* Nov 02 2022 This book illustrates the various facets of internationalization in managerial practice, starting with a strategic outline of the many options firms have when formulating internationalization strategies. Designed as a textbook for Bachelor, Master and MBA classrooms, the core of the book consists of six case studies on firms from diverse industries, such as sporting goods, aviation, grocery discount, motorcycle, computer and IT, and fast-food. The cases present a variety of ways of entering and operating in foreign markets, such as export, franchising, joint ventures, strategic alliances, greenfield-investments, acquisitions and mergers. In addition to market entry strategies, the cases provide readers, educators and students with insights into target market strategies, timing strategies, allocation strategies and coordination strategies of well-known companies.

**Organizing Democracy** May 28 2022 In the past twenty-five years, a number of countries have made the transition to democracy. The support of international

organizations is essential to success on this difficult path. Yet, despite extensive research into the relationship between democratic transitions and membership in international organizations, the mechanisms underlying the relationship remain unclear. With *Organizing Democracy*, Paul Poast and Johannes Urpelainen argue that leaders of transitional democracies often have to draw on the support of international organizations to provide the public goods and expertise needed to consolidate democratic rule. Looking at the Baltic states' accession to NATO, Poast and Urpelainen provide a compelling and statistically rigorous account of the sorts of support transitional democracies draw from international institutions. They also show that, in many cases, the leaders of new democracies must actually create new international organizations to better serve their needs, since they may not qualify for help from existing ones.

**International Aid to Education** Sep 07 2020 Partnerships are now pervasive in global education and development, but are they creating equitable, cooperative, and positive relationships? Through case studies of prominent multistakeholder partnerships—including the Education Cannot Wait Fund and Global Partnership for Education—as well as a comprehensive analysis of the global education network, this book exposes clear power imbalances that persist in the international aid environment. The author reveals how actors and organizations from high-income countries continue to wield disproportionate influence, while the private sector holds a growing degree of authority in public policy circles. In light of such evidence, this book questions if partnerships truly ameliorate power asymmetries, or if they instead reproduce the precise inequities they are meant to eliminate. “The use of partnerships for international aid and development has become ubiquitous, and their value has been too-little questioned. For education, Francine Menashy’s book remedies this with a detailed, probing analysis of such partnerships in theory and practice.” —From the Foreword by Steven J. Klees, University of Maryland “International Aid to Education is an urgent read for anyone working in international development. Menashy’s work points to ways in which all of us working in research, policy, and practice can rethink our own roles in perpetuating power imbalances and inequities.” —Sarah Dryden-Peterson, Harvard Graduate School of Education “Francine Menashy’s new book provides a fresh and innovative take on power and politics within multistakeholder partnerships in international development. It makes a strong new contribution to the study of global governance and education policy.” —Karen Mundy, chief technical officer, Global Partnership for Education

**Encyclopedia of International Relations and Global Politics** Dec 23 2021 The study of international relations has changed rapidly in recent years. Firstly as a consequence of major political and economic change – the end of the cold war and the fall of communism, the resurgence of nationalism, terrorism and forms of fundamentalism, globalization – and secondly, linked with these developments, because of the vitality of the discipline, with ongoing debates on the fundamental paradigms for the understanding of international relations and the emergence of the perspectives of feminism, postmodernism, constructivism and critical theory. The Routledge Encyclopedia of International Relations and Global Politics provides a unique reference source for students and academics covering all aspects of global international relations and the contemporary discipline across IR's major subject divisions of diplomacy, military affairs, international political economy, and theory. Written by a distinguished group of international scholars, the Encyclopedia is largely comprised of substantial entries of more than 1,000 words, with fifty major entries of 5,000 words on core contemporary topics. Each entry is fully cross-referenced and followed by a listing of complementary entries and a short bibliography for further reading. The whole is comprehensively indexed. There is no other resource of its kind and the Encyclopedia of International Relations and Global Politics will be an extremely valuable addition to all libraries supporting teaching and research in the social sciences.

Ethics and Authority in International Law Oct 09 2020 The specialized vocabularies of lawyers, ethicists, and political scientists obscure the roots of many real disagreements. In this book, the distinguished American international lawyer Alfred Rubin provides a penetrating account of where these roots lie, and argues powerfully that disagreements which have existed for 3,000 years are unlikely to be resolved soon. Attempts to make 'war crimes' or 'terrorism' criminal under international law seem doomed to fail for the same reasons that attempts failed in the early nineteenth century to make piracy, war crimes, and the international

traffic in slaves criminal under the law of nations. And for the same reasons, Professor Rubin argues, it is unlikely that an international criminal court can be instituted today to enforce ethicists' versions of 'international law'.

**Political Turmoil in a Tumultuous World** Jul 30 2022 In the last two years, Canadian society has been marked by political and ideological turmoil. How does an increasingly divided country engage a world that is itself divided and tumultuous? Political instability has been reinforced by international uncertainty: the COVID-19 pandemic, populism, Black Lives Matter, and the chaotic final year of the Trump presidency that increased tensions between the West, China and Russia. Even with a Biden presidency, these issues will continue to influence Canada's domestic situation and its ability to engage as an effective global actor. Contributors explore issues that cause or reflect these tensions, such as Canada's willingness to address pressing crises through multilateralism, including the COVID-19 pandemic. Can Canada forge its own path in a turbulent world?
