Commentators spend much time at the frontiers of the subject, responding rapidly to new developments and providing guidance to scholars, legislators, and judges for future directions. In these circumstances, there is rarely a chance to reflect upon the implications of these changes for the fundamentals of public law and how those fundamentals relate to one another. In this collection, leading figures in UK and EU public law address this lacuna. Inspired

by the depth, scope, and ambition of the work of Paul Craig, Professor of English Law at Oxford University, the focus of this collection is upon exploring and reflecting upon six fundamentals of public law and the interrelationship between them: legislation, case law, theory, institutions, process, and constitutions.

New Developments in the Brewing Industry Jun 16 2021 Institutions and ownership play a central role in the transformation and development of the beer market and brewing industry. Institutions set the external environment of the brewery through both formal requirements and informal acceptance of company operations by the public. On the other hand, owners and managers adapt to these external challenges while following their own strategic agenda. This book explores the implications of this dynamic for the breweries, discussing how changes in institutions have contributed to the restructuring of the industry and the ways in which breweries have responded, including a craft beer revolution with a surge in demand of special flowered hops, a globalization strategy from the macro breweries, outsourcing by contract brewing, and knowledge exchange for small sized breweries. Structured

in two parts, with a focus on institutions (Part I) and ownership (Part II) respectively, this book examines the link between institutions and governance in one of the most dynamic and innovative industries.

Constitutional Remedies in Asia Oct 09 2020

Many jurisdictions in Asia have vested their courts with the power of constitutional review. Traditionally, these courts would invalidate an impugned law to the extent of its inconsistency with the constitution. In common law systems, such an invalidation operates immediately and retrospectively; and courts in both common law and civil law systems would leave it to the legislature to introduce corrective legislation. In practice, however, both common law and civil law courts in Asia have devised novel constitutional remedies, often in the absence of explicit constitutional or statutory authorisation. Examining cases from Hong Kong, Bangladesh, Indonesia, India, and the Philippines, this collection of essays examines four novel constitutional remedies which have been judicially adopted - Prospective Invalidation, Suspension Order, Remedial Interpretation, and

Judicial Directive - that blurs the distinction between adjudication and legislation.
