Studebaker Sep 02 2022 Studebaker began business as a builder of covered wagons. By 1921 they were the number four automaker in the nation. By 1932 they were bankrupt. And for Studebaker, one of the most remarkable stories in American automotive history, that was only the beginning. **Studebaker: America's Most Successful Independent Automaker** tells the full and fabulously colorful history of this icon of the American automotive scene. Rife with triumph and tragedy, brilliant moves and boneheaded decisions, Studebaker's decades of building cars makes for a tempestuous saga featuring some of the more interesting characters in the twentieth-century business world. But, above all, the story features cars that, for countless Americans, truly defined driving: not just the Champion, which rocketed the company back to the top in 1939, or the 1950s Raymond Lowey-designed Starliner, deemed a "work of art" by the Museum of Modern Art, but also the Hawks and Larks that so many drivers loved. As the book traces Studebaker's fortunes from success to crisis to merger and back, it also dwells with loving photographic attention on the vehicles, from the first electric car to the last Avanti.

Torpedo Sep 29 2019 An encyclopedic study of the ship-killer par excellence—from its development to post-World War II usage. "A well-written book, lavishly illustrated." —International Journal of Maritime History The torpedo was the greatest single game-changer in the history of naval warfare. For the first time it allowed a small, cheap torpedo-firing vessel—and by extension a small, minor navy—to threaten the largest and most powerful warships afloat. The traditional concept of seapower, based on huge fleets of expensive capital ships, required radical rethinking because of this important naval weapon. This book is a broad-ranging international history of the weapon, tracing not only its origins and technical progress down to the present day, but also its massive impact on all subsequent naval wars. **Torpedo** contains much new technical information that has come to light over the past thirty years and covers all of the improved capabilities of the weapon. Heavily illustrated with photos and technical drawings this is a book no enthusiast or historian can afford to miss. "The torpedo—one of the most fearsome weapons ever created by man—is well worth its own history." —Forum Navale

The Ultimate History of Video Games, Volume 2 Aug 28 2019 The definitive behind-the-scenes history of video games' explosion into the twenty-first century and the war for industry power "A zippy read through a truly deep research job. You won't want to put this one down."—Eddie Adlum, publisher, RePlay Magazine As video games evolve, only the fittest companies survive. Making a blockbuster once cost millions of dollars; now it can cost hundreds of millions, but with a \$160 billion market worldwide, the biggest players are willing to bet the bank. Steven L. Kent has been playing video games since Pong and writing about the industry since the Nintendo Entertainment System. In volume 1 of *The Ultimate History of Video Games*, he chronicled the industry's first thirty years. In volume 2, he narrates gaming's entrance into the twenty-first century, as Nintendo, Sega, Sony, and Microsoft battle to capture the global market. The home console boom of the '90s turned hobby companies like Nintendo and Sega into Hollywood-studio-sized business titans. But by the end of the decade, they would face new, more powerful competitors. In boardrooms on both sides of the Pacific, engineers and executives began, with enormous budgets and total secrecy, to plan the next evolution of home consoles. The PlayStation 2, Nintendo GameCube, and Sega Dreamcast all made radically different bets on what gamers would want. And then, to the shock of the world, Bill Gates announced the development of the one console to beat them all—even if Microsoft had to burn a few billion dollars to do it. In this book, you will learn about • the cutthroat environment at Microsoft as rival teams created console systems • the day the head of Sega of America told the creator of Sonic the Hedgehog to "f**k off" • how "lateral thinking with withered technology" put Nintendo back on top • and much more! Gripping and comprehensive, *The Ultimate History of Video Games: Volume 2* explores the origins of modern consoles and of the franchises—from Grand Theft Auto and Halo to Call of Duty and Guitar Hero—that would define gaming in the new millennium.

Sapiens Apr 04 2020 New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human." One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.
