Regional Private Laws and Codification in Europe Jul 06 2020 Regions within European Union member states (such as Scotland in the UK and Catalonia in Spain) have their own legal systems: how will the process of 'Europeanization' affect them? This volume examines the phenomenon of 'regional' private law in the European Union, considering jurisdictions and laws below those of the member states and drawing comparisons with other such jurisdictions elsewhere in the world, such as Louisiana and Quebec. The whole is considered in relation to the development of European private law, and the use of codification in that process. This volume will be of interest to academic lawyers worldwide, advanced law students and European policy-makers.

The Code Napoleon, Or, The French Civil Code Jul 30 2022 [Spence, George, Translator]. The Code Napoleon; or, the French Civil Code. Literally Translated from the Original and Official Edition, Published at Paris, in 1804, by a Barrister of the Inner Temple. London: Printed for Charles Hunter, Law Bookseller, 1824. xix, 627 pp. Reprinted 2004 by The Lawbook Exchange, Ltd.

LCCN 2003052754. ISBN 1-58477-375-8. Cloth. \$120. * Reprint of the second English edition. A comprehensive reformation and codification of the French civil laws, the Code Napoleon was renamed the Civil Code after the Bourbon restoration, and is still in force. It has served as the model for the legal codes of more than twenty nations throughout the world. The French Revolution overturned many of the hundreds of codes of law that had prevailed from ancient times, and added more than 14,000 pieces of legislation. After the National Convention and Directory failed in five attempts to organize this unwieldy mass, Napoleon appointed a commission to draft the new Civil Code. It was enacted in March 21, 1804, after a three year period of 87 sessions. It embodies a typically Napoleonic mix of liberalism and conservatism. Most of the freedoms won by the revolution, such as equality before the law, freedom of religion and the abolition of feudalism were preserved. At the same time, the Code reinforced patriarchal power by making the husband the ruler of the household. According to the Dictionary of National Biography, this work was translated by George Spence [1787-1850], an English jurist and Barrister of the Inner Temple. Dictionary of National Biography XVIII:743.

The Lost Translators of 1808 and the Birth of Civil Law in Louisiana Jul 26 2019 In 1808 the legislature of the Louisiana territory appointed two men to translate the Digest of the Laws in Force in the Territory of Orleans (or, as it was called at the time, simply the Code) from the original French into English. Those officials, however, did not reveal who received the commission, and the translators never identified themselves. Indeed, the “translators of 1808” guarded their secret so well that their identities have remained unknown for more than two hundred years. Their names, personalities, careers, and credentials, indeed everything about them, have been a missing chapter in Louisiana legal history. In this volume, Vernon Valentine Palmer, through painstaking research, uncovers the identity of the translators, presents their life stories, and evaluates their translation in the context of the birth of civil law in Louisiana. One consequence of the translators' previous anonymity has been that the translation itself has never been fully examined before this study. To be sure, the translation has been criticized and specific errors have been pointed out, but Palmer's study is the first general evaluation that considers the translation's goals, the Louisiana context, its merits and demerits, its innovations, failures, and successes. It thus allows us to understand how much and in what ways the translators affected the future course of Louisiana law. The Lost Translators, through painstaking research, uncovers the identity of the translators, presents their life stories, and evaluates their translation in the context of the birth of civil law in Louisiana.

Civil Law Reforms in Post-Colonial Asia Aug 19 2021 This book focuses on the legal systems of the late-developing countries of ASEAN (Cambodia, Laos, Myanmar, and Vietnam, often referred to as the CLMV countries). These nations are apt to be placed in an economically disadvantageous situation within the opportunity of communalization of legal systems being advanced by the ASEAN Economic Community (AEC) launched in 2015, and the book clarifies the dynamics of the changes within these legal systems. Concurrently, there is an intention to analyze the “legal system development support” that has continued to be provided to these countries since the mid-1990s via international development support from international organizations and developed countries including Japan. In particular, the emphasis has been on the area of civil law, where the main subject of Japan's support has been centered on the civil code and civil procedure code. The legal system of the recipient country is complicated by the crisscrossing of the remnants of previous eras, from the inherent laws that have existed since before colonization, the laws of the colonial powers that were introduced during the colonial era (French law in Cambodia, Laos, and Vietnam; English law in Myanmar), the influence of socialist law after independence from colonization, and the path of modern industrialization and development, such that one country's legal system is the combination of all of these influences. For the reader to understand the dynamics of these changing laws, each chapter of the book combines two methodological perspectives. The first is to ascertain the spatial range as to how far the civil law extends across social phenomena. The second is a historical perspective in which the trends in legal changes will be understood on a time axis.

Contract Law in Japan Jan 12 2021 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in Japan covers every aspect of the subject – definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Japan will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.

Introduction on The Civil Code of Cambodia Dec 11 2020 Document from the year 2015 in the subject Law - Comparative Legal Systems, Comparative Law, , language: English, abstract: On December 08, 2007 the new Civil Code of Cambodia was promulgated by Royal Kram No NS/RKM/1207/030. Together with the Criminal Code, the Civil Procedure Codes, and the Criminal Code it was defined as both a fundamental law as well as a strategic objective of the Council for the Legal and Judicial Reforms. This legislation was part of the first phase of the “Plan of Action for Implementing the Legal and Judicial Reform Strategy” which was implemented by the Royal Government of Cambodia on 29 April 2005. The impetus for the Cambodian government to set out a policy on legal and judicial reform came from the plan to enter WTO. Due to the fact that most of the legal provisions dealing with civil matters have been scattered and insufficient, a compilation of those legal texts followed by updated provisions was required. This was the impetus for drafting a new Civil Code with a unified, consistent, and complete set of civil laws. This is why the Civil Code has become the core piece of legislation in the private law sector regulating the most areas of private life, including business activities and property rights.

Civil Code of the Republic Belarus Oct 21 2021 Even though the economic union of Russia and Belarus is virtually complete, important material differences persist between the civil codes of the two countries. Of particular significance to foreign investors in Belarus are the provisions regulating intellectual property, inheritance, and private international law--provisions that set Belarus apart from other CIS jurisdictions and that make it especially attractive to businesses critically affected by these considerations. This fourth volume in the CIS Civil Code series presents the Belarus Civil Code that entered into force on 1 July 1999. William E. Butler’s English translation is of the high quality that has come to be expected by counsel for international investors with a special

interest in the CIS countries.

The French Civil Code Jun 28 2022 This book charts the formation of the French Civil Code, examining both its public and private effects. From the sixteenth to the eighteenth century, French private law was very different in the various parts of the country. In northern and central France, there were as many as sixty-five general customs in force, as well as over three hundred local customs, often differing from them in detail. As the feeling of nationhood grew, so did the idea of replacing the existing variety of laws by a single private law, possibly a code, common to all of France. 'A single body of law, called the Code Civil is to be created' proclaimed the Law of 21 March 1804, which was created by the amalgamation of thirty-six texts. The French Civil Code analyzes the Code using contemporary and modern sources, including the beautiful and concise extract from H.A.L. Fisher's History of Europe which gives an English historian's appraisal of Napoleon's contribution to the Code Civil. This text will appeal to all students of and those with an interest in international law.

The Essential of a Contract in German Civil Law May 04 2020 Seminar paper from the year 2018 in the subject Law - Civil / Private / Industrial / Labour, grade: 2, University of applied sciences, Düsseldorf, language: English, abstract: This paper presents the essentials of a contract as a part of the German civil law and how it is governed through this law. An important characteristic of German civil law system which sets it apart from common law system is the codification of core rules received from Roman law. These codes are drafted in order to cover all relationships within the field of law they govern. The provisions of a code are the references for a great many practical legal problems arise within that field over time. The concept of codification was developed in order to form a base where the laws of a given field can be found in one category - the code - instead of creating many judicial decisions. Beside its general part, German civil code contains other four divisions; the law of obligations, the law of property, the law of family or domestic relations, and the law of inheritance. The whole commercial law falls under the law of obligation regulated by the code. This includes e.g. the law of bills, notes, shipping, insurance, patents, copyrights, trademarks, contracts, and business transactions. This way of codification provides all citizens with a collection of laws they must follow. These laws constitute a systematic written collection of interrelated articles arranged by subject of matter.
