Wain-Roy and the Invention of the Backhoe Oct 24 2021 In 1947 Vaino J. Holopainen (Waino) and Roy E. Handy Jr. of the small town of Hubbardston, Massachusetts developed the world's first backhoe. This revolutionary invention that could dig and load by swinging side to side, was also the world's first all hydraulically actuated and controlled machine for digging. Vaino and Roy then formed Wain-Roy Corporation. Their grassroots contribution to the earth moving industry led to the development of twenty-six major backhoe related break-through designs, including the tractor loader backhoe, which formed the worldwide multi-billion-dollar industry that we know today. The amazing story of Wain-Roy and the invention of the backhoe is one of inspiration, struggle, genius, success, theft and failure. Credit for the backhoe is often given to other larger outfits who no-doubt fueled the rise of its widespread use. Few people alive still remember the greatest triumphs and failures of the true inventors and innovators of first backhoe and the first all-hydraulic digger. Authors Lee Horton and Dave Willens, two engineers from Central Massachusetts, wanted to capture this fascinating history before it was lost to time.

Manufacturing Whiteness Sep 30 2019 In a series of convergent empirical essays, Manufacturing Whiteness explores the striking parallels in the social construction of whiteness and gender in colonial depictions of the colonizer/colonized and in contemporary advertising. The past decade has seen a sincere, if belated, willingness among white male scholars to self-critically examine the oppressive social, cultural, and political implications of their whiteness. Building on Jacques Lacan's powerfully original social-psychoanalytic insights into the role of desire in the fetishistic constitution of the subject-in-language, Manufacturing Whiteness offers a sophisticated, yet accessible theoretical method for deconstructing ad-content which enables the reader to trace whiteness, "otherness," and other worldliness to the very constitution of latemodern/postmodern western identity.
