[Encyclopedia of Image Processing](#) Jan 14 2021 The Encyclopedia of Image Processing presents a vast collection of well-written articles covering image processing fundamentals (e.g. color theory, fuzzy sets, cryptography) and applications (e.g. geographic information systems, traffic analysis, forgery detection). Image processing advances have enabled many applications in healthcare, avionics, robotics, natural resource discovery, and defense, which makes this text a key asset for both academic and industrial libraries and applied scientists and engineers working in any field that utilizes image processing. Written by experts from both academia and industry, it is structured using the ACM Computing Classification System (CCS) first published in 1988, but most recently updated in 2012.

[Sport Development in the United States](#) Jul 20 2021 The development of both elite, high performance sport and mass participation, grassroots-level sport are central concerns for governments and sports governing bodies. This important new study is the first to closely examine the challenges and opportunities for sports development in the United States, a global sporting giant with a unique, market-driven sporting landscape. Presenting an innovative model of integrated sports development, the book explores the inter-relationship between elite and mass sport across history, drawing on comparative international examples from Australia to the former USSR and Eastern bloc countries. At the heart of the book is an in-depth empirical study of three (traditional and emerging) sports in the US – tennis, soccer and rugby – that offer important lessons on the development of elite sport, methods for increasing participation, and the establishment of new sports in new markets. No other book has attempted to model sports development in the United States in such depth before. Therefore this should be essential reading for all students, researchers, administrators or policy-makers with an interest in sports development, sports management, sports policy, or comparative, international sport studies.

[Wielding Words like Weapons](#) Jun 30 2022 *Wielding Words like Weapons* is a collection of acclaimed American Indian Movement activist-intellectual Ward Churchill's essays in indigenism, selected from material written during the decade 1995–2005. It includes a range of formats, from sharply framed book reviews and equally pointed polemics and op-eds to more formal essays designed to reach both scholarly and popular audiences. The selection also represents the broad range of topics addressed in Churchill's scholarship, including the fallacies of archeological and anthropological orthodoxy such as the insistence of "cannibologists" that American Indians were traditionally man-eaters, Hollywood's cinematic degradations of native people, questions of American Indian identity, the historical and ongoing genocide of North America's native peoples, and the systematic distortion of the political and legal history of U.S.-Indian relations. Less typical of Churchill's oeuvre are the essays commemorating Cherokee anthropologist Robert K. Thomas and Yankton Sioux legal scholar and theologian Vine Deloria Jr. More unusual still is his profoundly personal effort to come to grips with the life and death of his late wife, Leah Renae Kelly, thereby illuminating in very human terms the grim and lasting effects of Canada's residential schools upon the country's indigenous peoples. A foreword by Seneca historian Barbara Alice Mann describes the sustained efforts by police and intelligence agencies as well as university administrators and other academic adversaries to discredit or otherwise "neutralize" both the man and his work. Also included are both the initial "stream-of-consciousness" version of Churchill's famous—or notorious—"little Eichmanns" opinion piece analyzing the causes of the attacks on 9/11, as well as the counterpart essay in which his argument was fully developed.

[The Family Roe: An American Story](#) Mar 16 2021 A masterpiece of reporting on the Supreme Court's most divisive case, *Roe v. Wade*, and the unknown lives at its heart. Despite her famous pseudonym, no one knows the truth about "Jane Roe," Norma McCorvey (1947–2017), whose unwanted pregnancy in 1970 opened a great fracture in American life. Journalist Joshua Prager spent years with Norma, discovered her personal papers, a previously unseen trove, and witnessed her final moments. With an explosive revelation at the core of the case, he tells her full story for the first time. Prager also traces Roe's fifty-year trajectory through three compelling figures: feminist lawyer Linda Coffee, who filed the original Texas lawsuit yet now lives in obscurity; Curtis Boyd, a former fundamentalist Christian, today a leading provider of third-trimester abortions; and Mildred Jefferson, the first Black female Harvard Medical School graduate, who became a pro-life leader with great secrets. Essential to our understanding of this key debate, the right to choose or the right to life, *The Family Roe* will change the way you think about our enduring American divide.

[Using Debate in the Classroom](#) Nov 23 2021 Debate holds enormous potential to build 21st century skills such as critical thinking, communication, collaboration, and conflict resolution in the K-12 classroom, but teachers often struggle to implement and contextualize it effectively. *Using Debate in the Classroom* draws on research from a variety of academic disciplines to explain the benefits of debate across subject areas, and describes how teachers can use debate to enliven their curriculum and support the aims of the Common Core. Topics include: Introducing debate as a pedagogical practice to engage students,

improve school culture, and disrupt the school to prison pipeline. Using debate to teach critical literacy and improve students' reading, writing, and speaking skills. Implementing role-playing techniques to strengthen information literacy and reasoning skills. Building students' empathy, perspective-taking skills, and cultural humility as they confront difficult social issues through debate. Appendices provide a variety of tools to assist K-12 teachers in implementing debate in the classroom, including ready-made debate activities, student handouts, and a step-by-step guide to introducing students to debate in just one week.

Digital Diplomacy Dec 01 2019 This book analyses digital diplomacy as a form of change management in international politics. The recent spread of digital initiatives in foreign ministries is often argued to be nothing less than a revolution in the practice of diplomacy. In some respects this revolution is long overdue. Digital technology has changed the ways firms conduct business, individuals conduct social relations, and states conduct governance internally, but states are only just realizing its potential to change the ways all aspects of interstate interactions are conducted. In particular, the adoption of digital diplomacy (i.e., the use of social media for diplomatic purposes) has been implicated in changing practices of how diplomats engage in information management, public diplomacy, strategy planning, international negotiations or even crisis management. Despite these significant changes and the promise that digital diplomacy offers, little is known, from an analytical perspective, about how digital diplomacy works. This volume, the first of its kind, brings together established scholars and experienced policy-makers to bridge this analytical gap. The objective of the book is to theorize what digital diplomacy is, assess its relationship to traditional forms of diplomacy, examine the latent power dynamics inherent in digital diplomacy, and assess the conditions under which digital diplomacy informs, regulates, or constrains foreign policy. Organized around a common theme of investigating digital diplomacy as a form of change management in the international system, it combines diverse theoretical, empirical, and policy-oriented chapters centered on international change. This book will be of much interest to students of diplomatic studies, public diplomacy, foreign policy, social media and international relations.

Climate Change and Cities Mar 28 2022 The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.

The national forest May 30 2022 The National Forest project was established in 1995 with the aim of creating a new English forest across a 200 square mile area, embracing parts of Leicestershire, Staffordshire and Derbyshire. The National Forest's purpose is to increase woodland cover to a third of The National Forest area, whilst demonstrating sustainable, multi-purpose land use, including growing timber, providing leisure and tourism facilities and developing natural habitats. Key features of The National Forest are its linkage of previously isolated ancient woodlands and the establishment of new nature reserves, as well as the provision of a framework for farm diversification and the regeneration of former coalfields. It is delivering tangible environmental, economic and social benefits to an area of the Midlands - much of which was suffering economic and environmental decline - through planting trees to create new woods and forests. Its achievement is not so much in trebling the proportion of land with tree cover to 18 per cent, but that, in so doing, it has helped to regenerate the local economy, open up the Forest to greater public use and improve the natural environment. The success has been built on the commitment and skills of all the partner organisations, and The National Forest Company has played a crucial leadership role to enable the project to deliver effectively the multiple benefits of forestry. There needs to be a systematic approach to disseminating the company's experiences so that lessons learned can be exploited across England.

Lesson Planning Tweaks for Teachers Sep 02 2022 Lesson planning is a requirement of every teacher. Whether you are planning your day-to-day lessons or a formal observation, planning is a skill that can be refined and improved to ensure your workload is manageable and your lessons exceptional. Aimed at committed and reflective teachers who want to develop their practice, this book introduces Tweaks for Teachers: small changes that make a big difference! It encourages you to review your current lesson planning practice and develop lessons that enable students to make outstanding learning gains. The book focuses on making practical, small changes that, over time, can make a real difference to the quality of learning and teaching in the classroom. Organised around real lesson snippets and full lesson plans covering every secondary subject, the book focuses on the key areas you need to plan for every lesson: assessment for learning, questioning, stretch and challenge and commitment to learning, as well as covering the importance of developing a good marking practice. Real examples of successful lessons are provided as well as a commentary of missed opportunities and practical 'tweaks' that could be made to improve students' learning and to develop outstanding teaching. This format means that the book is not only useful to those teachers wanting to develop their practice, but it is also a really useful training tool for those with responsibility for training new teachers or devolving a school's CPD provision. Lesson Planning Tweaks for Teachers takes a highly original approach to improving your lesson planning. Mel and Debbie's down to earth and accessible style will help every secondary teacher, whatever your level of experience, to make the planning process more meaningful and manageable, and one that leads to outstanding progress over time. Handbook of Community Movements and Local Organizations in the 21st Century Nov 11 2020 This new handbook builds on The Handbook of Community Movements and Local Organizations published in 2007, and is the only resource defining the field of study related to small nonprofit organizations and to studying communities from the standpoint of associations that make up communities. It explores the history and conceptualizations of community, theoretical concepts in community organizations, social movements ranging from health to crime, and community practice methods. Further it provides authoritative statements of major theory areas, gives examples of different sub areas of the field, provides guidance to people working as practitioners in the field, and nicely coincides with the increasing interest in clinical sociology. This handbook is of great interest to academics, students and practitioners with an interdisciplinary resource to understand and collaborate in work with contemporary communities.

Formal Approaches in Categorization Jan 26 2022 The process of constructing concepts underpins our capacity to encode information in an efficient and competent manner and also, ultimately, our ability to think in terms of abstract ideas such as justice, love and happiness. But what are the mechanisms which correspond to psychological categorization processes? This book unites many prominent approaches in modelling categorization. Each chapter focuses on a particular formal approach to categorization, presented by the proponent(s) or advocate(s) of that approach, and the authors consider the relation of this approach to other models and the ultimate objectives in their research programmes. The volume evaluates progress that has been made in the field and where it goes from here. This is an essential companion to any scientist interested in the formal description of categorization and, more generally, in formal approaches to cognition. It will be the definitive guide to formal approaches in categorization research for years to come.

Science and Service Learning Dec 13 2020 "The goal of Volume VII of Research in Science Education is to examine the relationship between science inquiry and service learning. Its primary intent is to bridge the gaps between research and practice. The volume is meant to be useful to science and service-learning researchers and practitioners such as teachers and administrators because it provides information about strategies to integrate service-learning into the science curriculum and instruction." --Publisher's website.

Democratic Ethical Educational Leadership Sep 29 2019 A democratic, ethical leader integrates democracy, social justice, and school reform through dialogue and is guided by a sense of responsibility to students, families, and the community. Democratic Ethical Educational Leadership presents a cohesive framework for aspiring and practicing leaders to explore the complex nature of leadership that can support democratic citizenry and social responsibility. Organized around the 5 "New DEEL" visions for leadership, chapters illustrate real people who embody these principles. This compelling vision for educational leadership, combined with diverse and vibrant examples of leadership in action, will serve as a critical guide for the rising generation of democratic ethical educational leaders in the US and abroad. Presenting contextualized, practical instances of this approach to leadership, this book will inspire educational leaders to reflect upon their practice and reach their potential as democratic leaders. Special Features Include: A unique framework to guide responsible, ethical leadership in today's schools. A series of case studies help readers identify key leadership qualities in context from which to illuminate their own emerging practice. End-of-chapter questions encourage exploration of leaders' motivations, processes, strategies, and lessons learned.

Handbook of Research on Teacher Practices for Diverse Writing Instruction Aug 21 2021 The art and practice of writing is complex and multidimensional; students often apply unique writing styles. As such, educators must apply focused teaching methods to nurture these unique forms of writing. Educators must stay up to date with the practices for diverse writing instruction in order to best engage with a diverse classroom. However, resources related to writing typically do not focus on the depth and breadth of writing, and there is a need for a resource that offers a comprehensive look at diverse writing instruction research. The Handbook of Research on Teacher Practices for Diverse Writing Instruction provides a rich discussion of the issues, perspectives, and methods for writing instruction currently in use, with an added lens focusing on diversity and equity. It provides unique coverage on the topic of writing instruction for practical implementation within the classroom setting. Covering topics such as student motivation, curriculum development, and content area instruction, this major reference work is an essential resource for preservice teachers, faculty and administration of K-12 and higher education, academic libraries, government officials, school boards, researchers, and academicians.

Enhancing the Effectiveness of Team Science Aug 28 2019 The past half-century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research, referred to as "team science." Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the challenges of collaboration can slow these teams' progress in achieving their scientific goals. How does a team-based approach work, and how can universities and research institutions support teams? Enhancing the Effectiveness of Team Science synthesizes and integrates the available research to provide guidance on assembling the science team; leadership, education and professional development for science teams and groups. It also examines institutional and organizational structures and policies to support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals. This report offers major public policy recommendations for science research agencies and policymakers, as well as recommendations for individual scientists, disciplinary associations, and research universities. Enhancing the Effectiveness of Team Science will be of interest to university research administrators, team science leaders, science faculty, and graduate and postdoctoral students.

Local Government and Urban Governance in Europe Oct 30 2019 This book discusses innovative responses and reforms developed in critical areas of urban governance in European countries. It examines the impact of European Union's policies on the urban agenda and on local governance, and the impact of the transition to democracy in Central and in Southern Europe on local self-government systems. The book is divided into three parts: i) Crisis, Reform and Innovation in Local Government; ii) EU Policies, the Urban Agenda and Local Governance; and iii) Citizen Participation in Local Government. Providing an extensive and updated overview of key challenges in the governance of cities in Europe, the book will be of interest to students and researchers in the broader field of urban studies, and for policy-makers, especially those engaged in urban governance in European countries. /div

The Routledge Companion to Media and Race Jan 02 2020 The Routledge Companion to Media and Race serves as a comprehensive guide for scholars, students, and media professionals who seek to understand the key debates about the impact of media messages on racial attitudes and understanding. Broad in scope and richly presented from a diversity of perspectives, the book is divided into three sections: first, it summarizes the theoretical approaches that scholars have adopted to analyze the complexities of media messages about race and ethnicity, from the notion of "representation" to more recent concepts like Critical Race Theory. Second, the book reviews studies related to a variety of media, including film, television, print media, social media, music, and video games. Finally, contributors present a broad summary of media issues related to specific races and ethnicities and describe the relationship of the study of race to the

study of gender and sexuality.

Leading from the North Jun 06 2020 Leading from the North aims to improve public dialogue around the future of Northern Australia to underpin robust and flexible planning and policy frameworks. A number of areas are addressed including social infrastructure, governance systems, economic, business and regional development, climate and its implications, the roles and trends in demography and migration in the region. This book not only speaks to the issues of development in Northern Australia but also other regional areas, and examines opportunities for growth with changing economies and technologies. The authors of this book consist of leading researchers, academics and experts from Charles Darwin University, The Australian National University, James Cook University, the Australian Institute of Marine Science and many other collaborative partners. Many of the authors have first-hand experience of living and working in Northern Australia. They understand the real issues and challenges faced by people living in Northern Australia and other similar regional areas. Backed by their expertise and experience, the authors present their discussions and findings from a local perspective.

Arvo Pärt's White Light Oct 11 2020 One of the most frequently performed contemporary composers, Arvo Pärt has become a phenomenon whose unusual reach is felt well beyond the concert hall. This ground-breaking collection of essays investigates both the causes and the effects of this success. Beyond the rhetoric of 'holy minimalism' that has accompanied the composer's reception since the mid-1980s, each chapter takes a fresh approach toward understanding how Pärt's music has occupied social landscapes. The result is a dynamic conversation among filmgoers (who explore issues of empathy and resemblance), concertgoers (commerce and art), listeners (embodiment, healing and the role of technology), activists (legacies of resistance) and performers (performance practice). Collectively, these studies offer a bold and thoughtful engagement with Pärt as a major cultural figure and reflect on the unprecedented impact of his music.

Productivity and Organizational Management May 06 2020 Effective work practices and good employee relations are a real necessity of nowadays organizations, as they can help to reduce absenteeism, turnover, organizational costs, conducting to high levels of commitment, effectiveness, performance as well as productivity. Addressing these questions, this book focuses on the implications of changes in productivity and organizational management, exploring models, tools and processes.

Getting to Grips with BIM Oct 03 2022 With the UK government's 2016 BIM threshold approaching, support for small organisations on interpreting, filtering and applying BIM protocols and standards is urgently required. Many small UK construction industry supply chain firms are uncertain about what Level 2 BIM involves and are unsure about taking first steps towards having BIM capability. As digitisation, increasingly impacts on work practices, Getting to Grips with BIM offers an insight into an industry in change supplemented by practical guidance on managing the transition towards more widespread and integrated use of digital tools to manage the design, construction and whole life use of buildings.

The Palgrave Handbook of Disciplinary and Regional Approaches to Peace Feb 01 2020 In this handbook, a diverse range of leading scholars consider the social, cultural, economic, political, and developmental underpinnings of peace. This handbook is a much-needed response to the failures of contemporary peacebuilding missions and narrow disciplinary debates, both of which have outlined the need for more interdisciplinary work in International Relations and Peace and Conflict studies. Scholars, students, and policymakers are often disillusioned with universalist and northern-dominated approaches, and a better understanding of the variations of peace and its building blocks, across different regions, is required. Collectively, these chapters promote a more differentiated notion of peace, employing comparative analysis to explain how peace is debated and contested.

Flourishing in Emerging Adulthood Feb 24 2022 Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood (e.g., identity, love, work, worldviews), the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood.

Defending Human Rights and Democracy in the Era of Globalization Apr 04 2020 The era of technology in which we reside has ushered in a more globalized and connected world. While many benefits are gained from this connectivity, possible disadvantages to issues of human rights are developed as well.

Defending Human Rights and Democracy in the Era of Globalization is a pivotal resource for the latest research on the effects of a globalized society regarding issues relating to social ethics and civil rights. Highlighting relevant concepts on political autonomy, migration, and asylum, this book is ideally designed for academicians, professionals, practitioners, and upper-level students interested in the ongoing concerns of human rights.
