[An Educator's Guide to Dual Language Instruction](#) Aug 31 2022 This user-friendly book is a key resource for teachers and administrators to ensure their school's success in implementing and maintaining a dual language program. Authors Gayle Westerberg and Leslie Davison share their own experiences leading a dual language school, the obstacles they overcame, and the best practices they learned along the way. The book is filled with step-by-step instructions and strategies you can try immediately, as well as inspirational stories from educators in urban and rural dual language programs across the country. Topics include: Choosing a model for your dual language program and involving all stakeholders in the transition process; Marketing your program effectively to recruit students and staff, including international teachers; Implementing a standards-based instructional framework focused on direct vocabulary instruction, extensive reading, and using language in context; Setting proficiency targets and using internal and external assessments to track students' progress; Incorporating technology for a more interactive and engaging language-learning experience. You'll also learn how to effectively transition your program through different grade levels and build a collaborative school culture for a strong, long-lasting K-12 dual language program. Additional resources are available on the authors' website, www.duallanguageinstruction.com.

Intelligent Freeway Transportation Systems Sep 27 2019 Intelligent Freeway Transportation Systems: Functional Design focuses on the efficient use of resources in the design of ITS. It discusses the principles of top down design starting with objectives and requirements, and provides guidance for the development and evaluation of functional design alternatives according to cost effectiveness principles. It shows how transportation planning principles such as Wardrop's Laws and traffic diversion principles relate to functional ITS device selections and equipment locations. Methodologies for translating objectives to functional device types are provided. Application factors to identify device deployment densities (e.g. number of detectors per mile) as a function of traffic conditions are provided, as are evaluation models for evaluating the benefits of design alternatives based on traffic conditions. Design guidance and benefits evaluation include the following functions: (1) Non-recurrent congestion – Improvement of incident clearance time, (2) Non recurrent congestion – Incident information to motorists, (3) Recurrent congestion – Information to motorists, (4) Ramp metering, (5) Motorist service patrols.

Planning Guide for Maintaining School Facilities Aug 26 2019 This title is no longer available in print. However, please visit the NCES website at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2003347> to view an electronic version of the text. As America's school buildings age, we face the growing challenge of maintaining the nation's education facilities at a level that enables our teachers to meet the needs of the 21st century learners. This tool has been developed to help readers better understand why and how to develop, implement, and evaluate a facilities maintenance plan. It focuses on: maintenance as a vital task in the responsible management of an education organization, the needs of an education audience, strategies and procedures for planning, implementing, and evaluating maintenance programs, a process to be followed, rather than a canned set of "one size fits all" solutions, and recommendations based on "best practices", rather than mandates. The document offers recommendations on the following important issues, which serve as chapter headings: Introduction to School Facilities Maintenance Planning Planning for School Facilities Maintenance Facilities Audits (Knowing What You Have) Providing a Safe Environment for Learning Maintaining School Facilities and Grounds Effectively Managing Staff and Contractors Evaluating Facilities Maintenance Efforts

[Zero to Genetic Engineering Hero](#) May 16 2021 Zero to Genetic Engineering Hero is made to provide you with a first glimpse of the inner-workings of a cell.

It further focuses on skill-building for genetic engineering and the Biology-as-a-Technology mindset (BAAT). This book is designed and written for hands-on learners who have little knowledge of biology or genetic engineering. This book focuses on the reader mastering the necessary skills of genetic engineering while learning about cells and how they function. The goal of this book is to take you from no prior biology and genetic engineering knowledge toward a basic understanding of how a cell functions, and how they are engineered, all while building the skills needed to do so.

Financial Accounting for Local and State School Systems Jul 26 2019 This handbook has been designed as the national standard for state and local education agencies to use in tracking and reporting financial data for school districts to use in preparing their comprehensive annual financial reports (CAFRs). The purpose of the handbook is to ensure that education fiscal data can be reported in a comprehensive manner. The 2009 Edition contains guidance conforming to Governmental Accounting Standards Board Statements, up to Statement 47. There are chapters on budgeting, governmental accounting and financial reporting. Account codes have been updated to reflect changes in the new reporting requirements and developments in technology and security. There are also special chapters on accounting student activity funds and a model for school level program cost accounting. Eight chapters comprise this guide: (1) Introduction; (2) Financial Reporting Within a System of Education Information; (3) Budgeting; (4) Government Accounting; (5) Financial Reporting; (6) Account Classification Descriptions; (7) Cost Accounting and Reporting for Educational Programs; and (8) Activity Fund Guidelines. Appendices include: (1) Summary of Account Code Changes Since 2003; (2) Other Resources; (3) Glossary of Acronyms; (4) Illustrative Financial Statements for an Independent School District; and (5) Criteria for Distinguishing Equipment from Supply Items. (Contains 27 exhibits.).

Let's Make Letters! Dec 11 2020 *Let's Make Letters!* is a playful and informative workbook that encourages play, creativity, and even making mistakes along the way. The book features instructional, speculative, and approachable exercises in an effort to build reader's skills, curiosity, and confidence. Creation of handmade letters by providing readers with more than fifty exercises to create their own unique letterforms. *Let's Make Letters!* includes exercises that range from simple lettering basics to the expressive and experimental - with imaginative prompts and tips to go beyond the margins of the book. Fail! Make ugly letters! Have fun! Designers, artists, scribblers, teachers, and students are encouraged to take up new and familiar tools to draw, depict, and distort letters in original and inventive ways. It's up to the letterer - pen in hand - to complete the book. By enabling letterers to draw, paint, tape, cut, and glue directly into its pages, *Let's Make Letters!* will fill a void in hand-lettering publications.

IGY Calendar Record: Ozone Instruction Manual Nov 21 2021 *Annals of the International Geophysical Year, Volume 26: IGY Calendar Record: Ozone Instruction Manual* presents various indices and highlights of the solar, geophysical and associated events which took place during the IGY, a period of intensified observation of the earth and its environment. This book is organized into two main parts encompassing six chapters. The first part describes the features of the charts and tables in this Calendar Record of the IGY. The Supplementary Tables are additional indices of world-wide auroral observations which could not conveniently be adapted to the Calendar Record itself. They also summarize for historical purposes the end product of the IGY World Days Program, namely the Calendar of Regular World Days and Intervals decided on before the IGY began and the declarations of Solar Alerts and Special World Intervals. The second part considers the determination of some constants used in the calculation of the amount of ozone from spectrophotometer measurements and an analysis of the accuracy of the results. This book is of value to geophysicists and researchers.
