Blood Into Ink Nov 29 2019 The experiences of women in twentieth-century wars in South Asia and the Middle East challenge the concept of the separation of front and homefront and of family and society common to most modern western wars. Women there have not only entered into what was once considered male-only territory in men's roles wearing men's clothing, but more important, they have entered explicitly as women playing a variety of roles in the conflicts surrounding them. Their self-conscious, self-confident presence has changed the nature of that territory. This anthology reflects the realization that through their writing, women have created a new mythology of the war-peace paradox that is grounded in the reality of their own lives. The works collected here illustrate the many ways in which women have become active participants in social conflict and military battles, speaking of war not only as an extraordinary but also as an ordinary experience of coping with violence and conflict on a daily basis.

Women's involvement with the rituals of violence does not begin or end with traditional war; their daily struggles for survival stretch seamlessly into the more public arena of political war. In this anthology, Drs. Cooke and Rustomji-Kerns offer a collection of journal entries, interviews, fiction, and poetry by twentieth-century Middle Eastern and South Asian women writing about war and political conflicts. Some of the works were written in English, but the majority were translated specifically for this anthology and are published here for the first time in English. Blood Into Ink is an important and much-needed addition to the rapidly growing literature on war and peace. The anthology will greatly enlarge our understanding of the role of women in one of the most central of human concerns.

[Creative Writing - From Think to Ink](#) Nov 09 2020 Plenty of writing advice out there is focused on the nuts and bolts of writing - how to do it, when, how to market it and where, etc. But this is not that sort of book. If you want to learn to write more compellingly, with more skill and expertise, you can do it, easily. The really tricky bit, though, is understanding why. Uncover this why for yourself and you get in touch with the inexhaustible engine of your creativity. The human core of why we bother to create at all. Get to know this root well and you will not need gimmicky books full of writing prompts to blast away your writer's block. You will not need "inspiration" or 31 awesome tips and tricks. When you were a baby, something made you open your mouth and speak. Understand the thing that inspired you to do this, and you're more than half way to being the creative, productive and generative human being you were destined to be. When you were a tiny baby, your head was full of mostly nothing and the world was new and unknown. You barely had the skill to move yourself around the environment, and you most definitely lacked the skill to do what humans are most known for - communication. As you grew and developed, though, something strange started to happen. The people around you, the things in your world - you began to understand that they could be reached. That in your infant isolation there was still a way to reach out and touch someone else's experience. You saw all around you evidence of this magical skill that you had yet to develop: language. Since before we were old enough to understand it, we've tried to master this almost god-like ability to shape symbols and concepts, reach into the mind of someone else and affect their hearts and minds, to bring about changes in the world, to connect and understand and share with another human being. At the root of all creative expression is a deep, inborn and very human desire to be heard and understood. For the writers among us, the urge to communicate more clearly, more beautifully, and in new ways never really left us. With the right words, new worlds can be created, new ideas can be incubated and grown, great heights and depths can be reached. Every brilliant idea had its first home in the written or spoken word, and if you are a writer or aspire to be one, you most likely understand this power better than anything. Ask yourself this simple question: why write at all? Once you've managed to answer this question for yourself you'll have found something that will be incredibly valuable to your writing career, wherever it takes you: your purpose. Tapping into the deep roots of why you are compelled to write at all is a brilliant way to unlock your true motivations and your ultimate reason for that urge to take what's in your head and put it out there in the world. Remember, all change and growth begins with the creativity of imagining something different. It's quite likely that opening the door on your innate creativity will invite all sorts of new skills and insights into your life, not just the verbal ones. This book will address: How to tap into your creative self and give your writing a heart Finding your own style and voice Creativity exercises How to develop your writing habit and be a writer 24/7 Ineffective vs. effective writing How to set up a writing community Writer's block, and why you should love it! Common writing myths and why they aren't true Writing blunders that you want to avoid The editing process Launching your work How to handle rejection And much more!

Copperplate Script Jun 24 2019 Copperplate Script - A Yin & Yang Approach by Paul Antonio, is an innovative, new technology applied to an historical script. The script presented in this manual is not an historical hand, but a geometric construct to aid in a more exacting understanding of the script. This construct assists with writing a cleaner and more beautiful copperplate script. The Technology reintroduces a comprehensive terminology for the parts of the letters - words used by the English Writing Masters in their Copybooks, in the 16th, 17th and 18th centuries, as well as additional names augmented from the historical record. Geometry and physics are used to explain how a curve works and where it sits in relation to the baseline. This concept, then compares how a car or a bicycle tackles a roundabout. Learning the skeletal forms, similar to learning Roman Capitals, is a key part of the manual. The process begins with using a pencil first, followed by the nib. The over-arching concept of the technology utilises 4Fold Symmetry. There are four facets in the 4Fold Symmetry, all of which have 2 aspects; simple and complex. Angular Confinement is the first facet. It shows how confining the curves, inside a plane sided figure (in this case a parallelogram), is like drawing a square to plot a circle. Additional pages of study include an extensive list of difficult-to-write practise words, exemplars of numbers and variations, ligatures of double letters and ampersands. Sections on Brush Copperplate, Flourishing and its rules, as well as a glossary, augment this fine body of work. This manual offers an extensive, in-depth study of Copperplate Script suitable for any level of ability and an extraordinary resource for the beginner, intermediate or advanced calligrapher.

Our War Paint Is Writers' Ink Mar 14 2021 Explores a little-known history of exchange between Anishinaabe and American writers, showing how literature has long been an important venue for debates over settler colonial policy and indigenous rights. For the Anishinaabeg the indigenous peoples of the Great Lakes literary writing has long been an important means of asserting their continued existence as a nation, with its own culture, history, and sovereignty. At the same time, literature has also offered American writers a way to make the Anishinaabe Nation disappear, often by relegating it to a distant past. In this book, Adam Spry puts these two traditions in conversation with one another, showing how novels, poetry, and drama have been the ground upon which Anishinaabeg and Americans have clashed as representatives of two nations contentiously occupying the same land. Focusing on moments of contact, appropriation, and exchange, Spry examines a diverse range of texts in order to reveal a complex historical network of Native and non-Native writers who read and adapted each other's work across the boundaries of nation, culture, and time. By reconceiving the relationship between the United States and the Anishinaabeg as one of transnational exchange, Our War Paint Is Writers' Ink offers a new methodology for the study of Native American literatures, capable of addressing a long history of mutual cultural influence while simultaneously arguing for the legitimacy, and continued necessity, of indigenous nationhood. In addition, the author reexamines several critical assumptions about authenticity, identity, and nationhood itself that have become common wisdom in both Native American and US literary studies. Adam Spry is Assistant Professor of Writing, Literature, and Publishing at Emerson College.

The Missing Ink Dec 31 2019 When Philip Hensher realized that he didn't know what a close friend's handwriting looked like ("bold or crabbed, sloping or upright, italic or rounded, elegant or slapdash"), he felt that something essential was missing from their friendship. It dawned on him that having abandoned pen and paper for keyboards, we have lost one of the ways by which we come to recognize and know another person. People have written by hand for thousands of years how, Hensher wondered, have they learned this skill, and what part has it played in their lives? The Missing Ink tells the story of this endangered art. Hensher introduces us to the nineteenth-century handwriting evangelists who traveled across America to convert the masses to the moral worth of copperplate script; he examines the role handwriting plays in the novels of Charles Dickens; he investigates the claims made by the practitioners of graphology that penmanship can reveal personality. But this is also a celebration of the physical act of writing: the treasured fountain pens, chewable ballpoints, and personal embellishments that we stand to lose. Hensher pays tribute to the warmth and personality of the handwritten love note, postcards sent home, and daily diary entries. With the teaching of handwriting now required in only five states and many expert typists barely able to hold a pen, the future of handwriting is in jeopardy. Or is it? Hugely entertaining, witty, and thought-provoking, The Missing Ink will inspire readers to pick up a pen and write.

The Social Life of Ink Mar 26 2022 A rich and imaginative discovery of how ink has shaped culture and why it is here to stay Ink is so much a part of daily life that we take it for granted, yet its invention was as significant as the wheel. Ink not only recorded culture, it bought political power, divided peoples, and led to murderous rivalries. Ancient letters on a page were revered as divine light, and precious ink recipes were held secret for centuries. And, when it first hit markets not so long ago, the excitement over the disposable ballpoint pen equalled that for a new smartphone with similar complaints to the manufacturers. Curious about its impact on culture, literature, and the course of history, Ted Bishop sets out to explore the story of ink. From Budapest to Buenos Aires, he traces the lives of the innovators who created the ballpoint pen revolutionary technology that still requires exact engineering today. Bishop visits a ranch in Utah to meet a master ink-maker who relishes igniting linseed oil to make traditional printers' ink. In China, he learns that ink can be an exquisite object, the subject of poetry, and a means of strengthening (or straining) family bonds. And in the Middle East, he sees the world's oldest Qur'an, stained with the blood of the caliph who was assassinated while reading it. An inquisitive and personal tour around the world, The Social Life of Ink asks us to look more closely at something we see so often that we don't see it at all.

Ink and Tears May 16 2021 How does an extended family, bound by shared history, affection, and duty but divided by generation, gender, status, and personality, memorialize its dead? This fascinating study shows how members of the prominent Yu family passed down their personal and familial memories over five generations, through the traumatic transition from imperial to modern China and amidst the radical change and destruction of the nineteenth and twentieth centuries. Their memory writing is unusual and compelling for its quantity, variety, and resonance of themes across generations. It reflects a particular cultural moment and family, yet offers insight into universal practices of writing and remembrance. Ink and Tears begins and ends with the Yu family's two most famous members: the late Qing writer Yu Yue and his great-great grandson Yu Pingbo, each among the most famous and prolific scholars of their respective generations. Over a span of one and a half centuries, they and their lesser-known female and male kin made use of an impressive diversity of genres--poetry, prefaces, biographies, diaries, correspondence, and strange tales--to preserve their family's memories. During the times in which they wrote, the technologies of printing and the institutions of publication and book distribution were being transformed, and by the time of the great-grandchildren the language of education and governance, definitions of scholarship and literature, and the map of literary genres had all been remade. The Yus' memory writing thus reveals not just how different family members remembered and mourned, but the changing tools they had with which to convey their loss. Drawing on a wealth of archival material, Rania Huntington focuses on questions of how memory was crafted, preserved, and transmitted as much as on what was remembered, tracing common tropes and shared strategies. Her beautifully observed study will interest scholars of late imperial and early Republican literature and history, as well as readers more broadly concerned with the family, women's writing, themes of memory and bereavement, and the personal functions of literature.
