NASA Apollo 11 Nov 29 2019 On July 20, 1969, US astronaut Neil Armstrong became the first man to walk on the moon. The Apollo 11 mission that carried him and his two fellow astronauts on their epic journey marked the successful culmination of a quest that, ironically, had begun in Nazi Germany thirty years before. This is the story of the Apollo 11 mission and the 'space hardware' that made it all possible. Author Chris Riley looks at the evolution and design of the mighty Saturn V rocket, the Command and Service Modules, and the Lunar Module. He also describes the space suits worn by the crew, with their special life support systems. Launch procedures are described, 'flying' the Saturn V, navigation, course correction 'burns', orbital rendezvous techniques, flying the LEM, moon landing, moon walk, take-off from the moon, and earth re-entry procedure. Includes performance data, fuels, biographies of Armstrong, Aldrin and Collins, Gene Kranz and Werner von Braun. Detailed appendices cover all of the Apollo missions, with full details of crews, spacecraft names and logos, mission priorities, moon landing sites, and the Lunar Rover.

Spiritual Intelligence and the Neuroplastic Brain Apr 14 2021 Our brains are getting wired differently in the world of digital technology, information revolution, and in the inter-cultural world of global society. Think of the new vocabulary: Global brain, collective intelligence, global village, and cyberspace. That should tell us something about the neural rewiring that is taking place inside of our brains, whether or not we are aware of it. The fact that the human brain changes throughout a person's life in response to intellectual stimulation, physical exercise, exposure to new cultural environments, learning opportunities, and challenges is a revolutionary discovery. Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence. That is the old dogma. There is a "Second Copernican Revolution" taking place inside of our brains, writes the author, quoting Carl Zimmer. Some experts are suggesting that we are already living in what Richard Restack calls the "neurosociety." Ray Kurzweil, the futurist, is predicting that by 2045 A.D., human beings will be living in an era of "singularity," when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times. What is going to be the fate of the human spirit, human spirituality, the feeling of connection to a force and power that is greater than us (God), our ability to use spiritual imagination and our intelligence? Are we progressively moving away from religion and community-based spirituality into the "spirituality of different strokes for different folks?" In his groundbreaking book, *Spiritual Intelligence and The Neuroplastic Brain: A Contextual Interpretation of Modern History*, Charles W. Mark takes the reader on a journey through modern history and shows the glimpse of what is to come. <http://www.spirituality-intelligence.com>
