Power Without Responsibility Jan 02 2020 This book argues that Congress's process for making law is as corrosive to the nation as unchecked deficit spending. David Schoenbrod shows that Congress and the president, instead of making the laws that govern us, generally give bureaucrats the power to make laws through agency regulations. Our elected "lawmakers" then take credit for proclaiming popular but inconsistent statutory goals and later blame the inevitable burdens and disappointments on the unelected bureaucrats. The 1970 Clean Air Act, for example, gave the Environmental Protection Agency the impossible task of making law that would satisfy both industry and environmentalists. Delegation allows Congress and the president to wield power by pressuring agency lawmakers in private, but shed responsibility by avoiding the need to personally support or oppose the laws, as they must in enacting laws themselves. Schoenbrod draws on his experience as an attorney with the Natural Resources Defense Council and on studies of how delegation actually works to show that this practice produces a regulatory system so cumbersome that it cannot provide the protection that people need, so large that it needlessly stifles the economy, and so complex that it keeps the voters from knowing whom to hold accountable for the consequences. Contending that delegation is unnecessary and unconstitutional, Schoenbrod has written the first book that shows how, as a practical matter, delegation can be stopped.

Think Again Dec 01 2019 #1 New York Times Bestseller “THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In *Think Again*, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I’ve never felt so hopeful about what I don’t know.” —Brené Brown, Ph.D., #1 New York Times bestselling author of *Dare to Lead* The bestselling author of *Give and Take* and *Originals* examines the critical art of rethinking: learning to question your opinions and open other people’s minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there’s another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational

psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of *Originals* and *Give and Take*, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. *Think Again* reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

What is Power? Dec 25 2021 Power is a pervasive phenomenon yet there is little consensus on what it is and how it should be understood. In this book the cultural theorist Byung-Chul Han develops a fresh and original perspective on the nature of power, shedding new light on this key feature of social and political life. Power is commonly defined as a causal relation: an individual's power is the cause that produces a change of behaviour in someone else against the latter's will. Han rejects this view, arguing that power is better understood as a mediation between ego and alter which creates a complex array of reciprocal interdependencies. Power can also be exercised not only against the other but also within and through the other, and this involves a much higher degree of mediation. This perspective enables us to see that power and freedom are not opposed to one another but are manifestations of the same power, differing only in the degree of mediation. This highly original account of power will be of great interest to students and scholars of philosophy and of

Not for the Faint of Heart Apr 04 2020 Distinguished diplomat Ambassador Wendy Sherman brings readers inside the negotiating room to show how to put diplomatic values like courage, power, and persistence to work in their own lives. Few people have sat across from the Iranians and the North Koreans at the negotiating table. Wendy Sherman has done both. During her time as the lead US negotiator of the historic Iran nuclear deal and throughout her distinguished career, Wendy Sherman has amassed tremendous expertise in the most pressing foreign policy issues of our time. Throughout her life -- from growing up in civil-rights-era Baltimore, to stints as a social worker, campaign manager, and business owner, to advising multiple presidents -- she has relied on values that have shaped her approach to work and leadership: authenticity, effective use of power and persistence, acceptance of change, and commitment to the team. *Not for the Faint of Heart* takes readers inside the world of international diplomacy and into the mind of one of our most effective negotiators -- often the only woman in the room. She shows why good work in her field is so hard to do, and how we can learn to apply core skills of diplomacy to the challenges in our own lives.

Sweetness and Power Jan 14 2021 A fascinating persuasive history of how sugar has shaped the world, from European colonies to our modern diets In this eye-opening study, Sidney Mintz shows how Europeans and Americans transformed sugar from a rare foreign luxury to a commonplace necessity of modern life, and how it changed the history of capitalism and industry. He discusses the production and consumption of sugar, and reveals how closely interwoven are sugar's origins as a "slave" crop grown in Europe's tropical colonies with its use first as an

Nonsense Oct 03 2022 An illuminating look at the surprising upside of ambiguity—and how, properly harnessed, it can inspire learning, creativity, even empathy Life today feels more overwhelming and chaotic than ever. Whether it's a confounding work problem or a faltering relationship or an unclear medical diagnosis, we face constant uncertainty. And we're continually bombarded with information, much of it contradictory. Managing ambiguity—in our jobs, our relationships, and daily lives—is quickly becoming an essential skill. Yet most of us don't know where to begin. As Jamie Holmes shows in *Nonsense*, being confused is unpleasant, so we tend to shutter our minds as we grasp for meaning and stability, especially in stressful circumstances. We're hard-wired to resolve contradictions quickly and extinguish anomalies. This can be useful, of course. When a tiger is chasing you, you can't be indecisive. But as *Nonsense* reveals, our need for closure has its own dangers. It makes us stick to our first answer, which is not always the best, and it makes us search for meaning in the wrong places. When we latch onto fast and easy truths, we lose a vital opportunity to learn something new, solve a hard problem, or see the world from another perspective. In other words, confusion—that uncomfortable mental place—has a hidden upside. We just need to know how to use it. This lively and original book points the way. Over the last few years, new insights from social psychology and cognitive science have deepened our understanding of the role of ambiguity in our lives and Holmes brings this research together for the first time, showing how we can use uncertainty to our advantage. Filled with illuminating stories—from spy games and doomsday cults to Absolut Vodka's ad campaign and the

Acting with Power Mar 16 2021 "Most of us tend to think that there are two kinds of people in world: those who have power, and those who don't. But in reality, says Stanford Business School professor Deborah Gruenfeld, we all have more power than we think. And success is not about how much power we have, but rather how we use it. It's often assumed that power flows to those with the highest rank, the loudest voice, or the most commanding presence in the room. But in fact, there exists a quieter, softer sort of power that's just as crucial to learn to wield as the forceful kind. In life just as on stage, sometimes the most powerful actor is the one in the supporting role rather than the lead"--

The Power of Not Thinking Nov 04 2022 SHORTLISTED FOR BEST SPECIALIST BUSINESS BOOK AT THE BUSINESS BOOK AWARDS 2021 Have you ever relied on your hand to remember your pin rather than your memory? Or acted out a golf stroke before going for it? Or listened to your gut on a big decision? In this insightful new book, leading business anthropologist Simon Roberts breaks down the revolutionary idea of embodied knowledge: the information that is unconsciously picked up by our body for use in every area of our lives. Drawing on his own experience working with some of the world's leading industry experts and looking at a range of real-life examples and cutting-edge science, Roberts explains the various ways in which our body acquires, retains and employs information and why we should learn to trust the instincts that inform the most crucial decisions and actions in our lives. *The Power of Not Thinking* shows why humans are capable of far more than we are currently led to believe. We just have to stop thinking and start trusting our bodies.

Why India Is Not a Great Power (Yet) Sep 21 2021 Since the economic liberalization of the early 1990s, India has been, on several occasions and at different forums, feted as a great power. This subject has been discussed in numerous books, but mostly in terms of rapid economic growth and immense potential in the emerging market. There is also a vast collection of literature on India's 'soft power' - culture, tourism, frugal engineering, and knowledge economy. However, there has been no serious exploration of the alternative path India can take to achieving great power status - a combination of hard power, geostrategics, and realpolitik. In this book, Bharat Karnad delves exclusively into these hard power aspects of India's rise and the problems associated with them. He offers an incisive analysis of the deficits in the country's military capabilities and in the 'software' related to hard power--absence of political vision and will, insensitivity to strategic geography, and unimaginative foreign and military policies--and arrives at powerful arguments on why these shortfalls have prevented the country from achieving the great power status.

political hobbyism—treating politics like entertainment—and a call to arms for well-meaning, well-informed citizens who consume political news, but do not take political action. Who is to blame for our broken politics? The uncomfortable answer to this question starts with ordinary citizens with good intentions. We vote (sometimes) and occasionally sign a petition or attend a rally. But we mainly “engage” by consuming politics as if it’s a sport or a hobby. We soak in daily political gossip and eat up statistics about who’s up and who’s down. We tweet and post and share. We crave outrage. The hours we spend on politics are used mainly as pastime. Instead, we should be spending the same number of hours building political organizations, implementing a long-term vision for our city or town, and getting to know our neighbors, whose votes will be needed for solving hard problems. We could be accumulating power so that when there are opportunities to make a difference—to lobby, to advocate, to mobilize—we will be ready. But most of us who are spending time on politics today are focused inward, choosing roles and activities designed for our short-term pleasure. We are repelled by the slow-and-steady activities that characterize service to the common good. In *Politics Is for Power*, pioneering and brilliant data analyst Eitan Hersh shows us a way toward more effective political participation. Aided by political theory, history, cutting-edge social science, as well as remarkable stories of ordinary citizens who got off their couches and took political power seriously, this book shows us how to channel our energy away from political hobbyism and toward empowering our values. an action guide to help readers practice the art of radical self-love both for themselves and to transform our society. Readers of *The Body Is Not an Apology* have been clamoring for guidance on how to do the work of radical self-love. After crowdsourcing her community, Sonya Renee Taylor found her readers wanted more concrete ideas on how to apply this work in their everyday lives. *Your Body Is Not an Apology Workbook* is the action guide that gives them tools and structured frameworks they can begin using immediately to deepen their radical self-love journey—such as Taylor's four pillars of practice, which help readers dismantle body shame and give them access to a lifestyle rooted in love. Taylor guides readers to move beyond theory and into doing and being radical self-love change agents in the world. “In this book, you will be asked to draw, color, doodle, talk to friends, take risks, and perhaps step outside of what feels like your natural gifts and talents,” Taylor writes. “I encourage you to release the need to be ‘good’ at what you are doing and instead strive to be authentic. Perfection is the enemy of radical self-love because it is an impossible illusion. When the voice of perfectionism chimes in, take a deep breath, remember that the work is about the process, not about the product, and give yourself permission to be fabulously unapologetically imperfect.”

According to Kidd, emotion rather than reason is held to be the source of power in life, not knowledge of intellect. The author's distrust of reason as a source of power, no doubt a casualty of World War I, and his doubts regarding the efficacy of knowledge are expressed throughout this work. The intellectual factor is held to be of slight, incidental value in the civilizing process. Kidd's interpretation of the failure of Western civilization is done convincingly and his constructive suggestions for the basis of a new social order are also interesting and thought provoking. The

Power, Race, and Justice Jan 26 2022 We are living in a world where power abuse has become the new norm, as well as the biggest, silent driver of persistent inequalities, racism and human rights violations. The COVID-19 socio-economic consequences can only be compared with those that followed World War II. As humanity is getting to grips with them, this timely book challenges current thinking, while creating a much needed normative and practical framework for revealing and challenging the power structures that feed our subconscious feelings of despair and defeatism. Structured around the four concepts of power, race, justice and restorative justice, the book uses empirical new data and normative analysis to reconstruct the way we prevent power abuse and harm at the inter-personal, inter-community and international levels. This book offers new lenses, which allow us to view power, race and justice in a modern reality where communities have been silenced, but through restorative justice are gaining voice. The book is enriched with case studies written by survivors, practitioners and those with direct experiences of power abuse and inequality. Through robust research methodologies, Gavrielides's new monograph reveals new forms of slavery, while creating a new, philosophical framework for restorative punishment through the acknowledgement of pain and the use of catharsis for internal transformation and individual empowerment. This is a powerful and timely book that generates much needed hope. Through a multi-disciplinary dialogue that uses philosophy and critical theory, social sciences, criminology, law, psychology and human rights, the book opens new avenues for practitioners, researchers and policy makers internationally.

Sensemaking Jul 08 2020 A Financial Times "Business Book of the Month" Based on his work at some of the world's largest companies, including Ford, Adidas, and Chanel, Christian Madsbjerg's *Sensemaking* is a provocative stand against the tyranny of big data and scientism, and an urgent, overdue defense of human intelligence. Humans have become subservient to algorithms. Every day brings a new Moneyball fix--a math whiz who will crack open an industry with clean fact-based analysis rather than human intuition and experience. As a result, we have stopped thinking. Machines do it for us. Christian Madsbjerg argues that our fixation with data often masks stunning deficiencies, and the risks for humankind are enormous. Blind devotion to number crunching imperils our businesses, our educations, our governments, and our life savings. Too many companies have lost touch with the humanity of their customers, while marginalizing workers with liberal arts-based skills. Contrary to popular thinking, Madsbjerg shows how many of today's biggest success stories stem not from "quant" thinking but from deep, nuanced engagement with culture, language, and history. He calls his method sensemaking. In this landmark book, Madsbjerg lays out five principles for how business leaders, entrepreneurs, and individuals can use it to solve their thorniest problems. He profiles companies using sensemaking to connect with new customers, and takes readers inside the work process of sensemaking "connoisseurs" like investor George Soros, architect Bjarke Ingels, and others. Both practical and philosophical, *Sensemaking* is a powerful rejoinder to corporate groupthink and an indispensable resource for leaders and innovators who want to stand out from the pack.

The Body Is Not an Apology Jul 28 2019 "A global movement guided by love Humans are a varied and divergent bunch with all manner of beliefs, morals, and bodies. Systems of oppression thrive off our inability to make peace with difference and injure the relationship we have with our own bodies. The Body Is Not an Apology offers radical self-love as the balm to heal the wounds inflicted by these violent systems. World-renowned activist and poet Sonya Renee Taylor invites us to reconnect with the radical origins of our minds and bodies and celebrate our collective, enduring strength. As we awaken to our own indoctrinated body shame, we feel inspired to awaken others and to interrupt the systems that perpetuate body shame and oppression against all bodies. When we act from this truth on a global scale, we usher in the transformative opportunity of radical self-love, which is the opportunity for a more just, equitable, and compassionate world for us all."

The Surprising Power of Not Knowing What to Do Dec 13 2020 In times of chaos, creativity and compassion are often the first causalities of our search for answers. We want to know what to do, yet we struggle to make sense of all the statistics, opinions, hype, and outrage competing for our attention. Coping with our increasingly complex and unpredictable lives takes a toll on our mental fitness. When we feel exhausted, overwhelmed, and rudderless, we make bad decisions. We settle for simplistic answers. We become susceptible to disinformation and the rantings of absolutists. We find ourselves avoiding people whose opinions we disagree with. The Surprising Power of Not Knowing What to Do is like a fitness regimen for your mind. The book explores the counterintuitive idea that being at a loss for what to do is an opportunity, not a problem. You will learn how to develop the mental stamina to deal with your most daunting challenges. You will discover strategies for accessing insights and options when you feel stuck. Most importantly, you will gain renewed faith in the possibility of a more creative and compassionate

The Last Word on Power: Executive Re-Invention for Leaders Who Must Make the Impossible Happen Aug 21 2021

How leaders can achieve something meaningful--transform a brand, a workplace, a technology, themselves--beyond holding an influential position. Do you want to do work that is worthy of your time and talent? Do you want to make your mark on your industry, company, or within your community? Are you satisfied with the fact that reengineering, quality improvements, and other changes never really make a lasting impact? Then you need to go beyond the techniques of improvement and learn the skills that it takes to be extraordinary. The power to be extraordinary is not one we are born with. Rather, it is a power that one can learn, and Tracy Goss helps executives realize this power. Here in this book for the first time, Goss makes her coursework available to the general reader. Goss's unique methodology shows how you how you can "put at risk the success you've become for the power of making the impossible happen." She positions executives to take on the future that they dream about. She teaches how to behave differently so that you are free of past constraints. She shows how you can be at home in the environment in which you are constantly surrounded by threats, and how to transcend the ordinary to make the impossible happen. Her work has resulted in many important life changes and organizational reinventions worldwide. "Goss offers powerful information, far above the glib self-help mush that already lines the shelves. She answers the fundamental question of why management fads do not work: the personal work has not yet been done." --Library Journal

Harnessing the Power of Tension Sep 09 2020 The word tension comes from the Latin word tendere, which means "to stretch." It's not a bad thing to be stretched in our careers, our parenting, our ministries, or our leadership. Without tension, we become stagnant and stop growing. In fact, we might even say that tension is both inevitable and, in many cases, desirable in life and

leadership. In *Harnessing the Power of Tension: Stretched but Not Broken*, international leadership consultant Sam Chand examines tension as it arises in and between the arenas of business, church, and family. The presence of tension isn't a flaw in you or a threat from others. It's not a problem to solve, but a strain to be used. When you develop this perspective and you encounter tension, you'll be less confused and feel less guilty because you understand that tension isn't the result of your error or flaw. You'll experience less pressure to figure everything out and less compulsion to resolve it quickly and completely. When we accept tension as a reality of life, we gain confidence and mental clarity when we encounter it. Our focus isn't on getting rid of tension, but using it to create something better than before. We don't walk on eggshells, afraid to say the wrong thing. We learn when to speak up, when to ask questions, when to listen, and when to let things go. As we relax in the middle of tension, we see people and situations more clearly, and we invite our families and teams into the process of creatively using tension in life and leadership.

Why Nations Fail Aug 28 2019 Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers,

and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? Why Nations Fail will change the way you look at—and understand—the world.

boundaries. A few words can destroy life or breathe new life into a withering one. Words can fill a person full of happiness or fill them full of despair. Words can build up a person's confidence, or take it crashing to the ground. As most people do not value their words, they misuse them, which allows the power of their words to work against them. They want to go in one direction, but their words push them in another. This conflict is what most people battle with each day. They ask God to grace their lives with favor, health and abundance, but their words keep them in a life full of disappointment, sickness, and lack. In this book, I want to share with you the correct way to harness the power of your words, so instead of holding you back, they propel you towards the life that you desire. The life that you were destined to live. I will draw from personal experience and Scripture to illustrate how positive thoughts and words can be used to overcome every challenge that stands in your way. I will share how important it is to stop the habit of talking idly about your problems and instead focus on speaking about solutions. "Knowing is not enough; we must apply. JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, *Volume Three*, was wack. People set higher standards for me, and I love it.

The End of Power Jul 20 2021 We know that power is shifting: From West to East and North to South, from presidential palaces to public squares, from once formidable corporate behemoths to nimble startups and, slowly but surely, from men to women. But power is not merely shifting and dispersing. It is also decaying. Those in power today are more constrained in what they can do with it and more at risk of losing it than ever before. In *The End of Power*, award-winning columnist and former Foreign Policy editor Moisés Naím illuminates the struggle between once-dominant megaplayers and the new micropowers challenging them in every field of human endeavor. Drawing on provocative, original research, Naím shows how the antiestablishment drive of micropowers can topple tyrants, dislodge monopolies, and open remarkable new opportunities, but it can also lead to chaos and paralysis. Naím deftly covers the seismic changes underway in business, religion, education, within families, and in all matters of war and peace. Examples abound in all walks of life: In 1977, eighty-nine countries were ruled by autocrats while today more than half the world's population lives in democracies. CEO's are more constrained and have shorter tenures than their predecessors. Modern tools of war, cheaper and more accessible, make it possible for groups like Hezbollah to afford their own

drones. In the second half of 2010, the top ten hedge funds earned more than the world's largest six banks combined. Those in power retain it by erecting powerful barriers to keep challengers at bay. Today, insurgent forces dismantle those barriers more quickly and easily than ever, only to find that they themselves become vulnerable in the process. Accessible and captivating, Naím offers a revolutionary look at the inevitable end of power—and how it will change your world.

The Love Mindset May 06 2020 "For anyone who's tired of feeling angry, depressed, or hurt, this book is a beacon of hope! The Love Mindset is a guide to healing yourself, no matter how hopeless and complicated things seem to be." –Christina Rasmussen, bestselling author of *Second Firsts* "As Vironika shared her own story, I saw pieces of myself and pieces of the people I care about. Many times the book brought me to tears and I had to put it down. It was like looking in the mirror and there was a part of me that was used to not looking." –Elephant Journal "If I had two words to describe *The Love Mindset*, they would be: fresh and powerful. This is because when I read it, something grabbed hold of me like it was the first time I'd seen a book in 5 years!"

–Reuben Lowe, *Mindful Creation* "Vironika Tugaleva's *The Love Mindset* is an authentic, brave and beautiful guide to a more loving self and a more loving world. A great gift of words for anyone searching for the sacred place of self-acceptance, self-understanding and self-love." –Howard Falco, spiritual teacher and author of *I AM: The Power of Discovering Who You Really Are* "In the midst of turmoil, this book comes as a breath of fresh air."

–Readers' Favorite After a decade-long struggle with mental distress, addiction, eating disorders, and profound self-hatred, Vironika Tugaleva faced a choice: change or die. Reluctantly, she chose to change. Nothing could have prepared her for what came next. Vironika's life as a suffering cynic ended when she found herself having a spiritual awakening. Drawing from first-hand experience, what Vironika says in this important and timely book

isn't fanciful fluff or indoctrinating dogma. Her approach to healing, love, and spirituality is unconventional, deep, and refreshingly real. Winner of the Readers' Favorite silver medal for best self-help book of 2013, *The Love Mindset* offers a surprisingly simple look at how we can heal our relationships with ourselves and with each other. If you feel like you're too broken to fix, hold out your last shred of hope and give Vironika a try. She won't disappoint you. She will teach you about the power of love, the purpose of life, and the potential of people united. She will show you to yourself.

Nuclear Power Is Not the Answer Aug 01 2022 The world-renowned antinuclear activist's expertly argued (The Guardian) case against nuclear energy. In a world torn apart by wars over oil, politicians have increasingly begun to look for alternative energy sources and their leading choice is nuclear energy. Among the myths that have been spread over the years about nuclear-powered electricity are that it does not cause global warming or pollution, that it is inexpensive, and that it is safe. Helen Caldicott's look at the actual costs and environmental consequences of nuclear energy belies the incessant barrage of nuclear industry propaganda. Caldicott reveals truths, Martin Sheen has said, that confirm we must take positive action now if we are to make a difference. In fact, nuclear power contributes to global warming; the true cost of nuclear power is prohibitive, with taxpayers picking up most of the tab; there's simply not enough uranium in the world to sustain nuclear power over the long term; and the potential for a catastrophic accident or a terrorist attack far outweighs any benefits. Concluding chapters detail alternative sustainable energy sources that are the key to a clean, green future.

No, You Shut Up Oct 30 2019 In this rousing call to leadership, the self-described millennial spokesperson for the culture, CNN's designated "woke AF" former commentator, and the youngest national press secretary in the history of the United States shares her take-no-prisoners approach to life, politics, and career success, and shows a new generation how to be loud and powerful in their own right. Many people--most notably white older men--may try to stop Symone Sanders from speaking up and out. But Symone will NOT shut up. And neither should you. In this inspiring call-to-action, Symone tells stories from her own life of not-shutting-up alongside loud young revolutionaries who came before her to help you find your authentic voice and use it to your advantage; to fight ideological battles more effectively; and to resist those who try to silence you. We are all gurus, masterminds, artists, entrepreneurs--we are the change agents we have been waiting for. IT IS US. And the time is RIGHT NOW. I know you're wondering, "But HOW?" And we don't have all the answers! Symone is the first to admit we're all winging it in one way or another. But the point is we're out there doing it. So get started. Open your mouth and start talking. Loudly. No You Shut Up goes beyond the surplus of "Vote-Or-Die" books we've seen before. Because change doesn't just happen at the ballot box. We need people fighting oppression, injustice, and inequality--in the workplace, on the cultural battlefield, in government, in every

The Power of a Humble Life Feb 01 2020

This book examines what I consider one of life's greatest paradox, that strength is found in humility. The problem is, humility does not come naturally to us. As we grow up, we find that pride is ingrained in our very being as we seek to prove to the world that our lives matter. We want to stand out in the crowd. Very few of us want to

be completely out of the limelight with a sense that his or her life is not important. One of the most important truths I have learned over the course of my life is that we are responsible for seeking a humble life and cultivating a humble heart. We must therefore realize that humility is a choice that we must first make, and then pursue. - Richard E. Simmons III.

Blank Feb 24 2022 A smart, hilarious parody of Malcolm Gladwell's bestselling Blink. Stop! Don't think! You already know what this book is about. That is the power of Blank: the power of not actually thinking at all. Using what scientific researchers call 'Extra-Lean Deli Slicing' (or would, if they actually bothered to research it), your brain has already decided whether you're going to like Blank, whether its cover goes with your shirt, and whether it will make you look smart if somebody sees you reading it on the train. Chances are you and your shirt are both liking it a lot, you're going to buy several copies, and you don't even know why! That's why you've absolutely got to read Blank: to find out why your brain keeps doing these wacky things without your permission. In Blank, a hilarious parody of the No. 1 bestseller it looks eerily like (and sort of rhymes with) and that your brain wisely advised you to just read a review or magazine excerpt about while avoiding the actual book itself, the brilliantly impulsive and slightly irresponsible Noah Tall explains how people as diverse as General Custer, Roy Rogers, a semi-famous rock star, and the entire New York City Police Department either won big or lost miserably as a result of their minds going completely blank.

Nuclear Power is Not the Answer to Global Warming Or Anything Else Jun 18 2021 In a world torn apart by wars over oil, politicians have increasingly begun to look for alternative energy sources—and their leading choice is nuclear energy. The myths that have been spread about nuclear-powered electricity are that it does not cause global warming or pollution, it is inexpensive and it is safe. In this revealing examination of the costs and consequences of nuclear energy, world-renowned antinuclear spokesperson Helen Caldicott uncovers the facts that belie the nuclear industry propaganda: nuclear power contributes to global warming; the true cost of nuclear power is prohibitive, with taxpayers picking up most of the tab; there's simply not enough uranium in the world to sustain nuclear power over the long term; and the potential for a catastrophic accident or a terrorist attack far outweighs any benefits. Trained as a physician and thoroughly versed in the science of nuclear energy, the bestselling author of *Nuclear Madness* and *Missile Envy* here turns her attention from nuclear bombs to nuclear lightbulbs. As she makes meticulously clear in this essential book, the world cannot withstand either.

The Power of Not Yet Mar 28 2022 Have you ever felt stuck in life? Or perhaps your life doesn't look the way you thought it would right now; maybe that dream is just beyond your reach as the words Not Yet appear stuck on repeat. Are your fears, failures, and imperfections trying to define your future the longer you are "on hold"? In *The Power of Not Yet*, Donna Pisani focuses on four powerful principles that not only changed her life but have done the same for countless others as well. With each principle she dismantles the lies of fear, failure, and imperfection that keep your purpose and potential hidden while addressing how to live with confident boldness in the middle of your Not Yet Zone. Through personal stories, biblical insights, and research, Donna delivers the simple truth that you were created for greatness. That every part of your life-past or present-is an incubator to discovering how to live the life of endless possibility God has designed for you. You will discover: * How to flip the light switch, expose the fears, and identify common lies you've been soothing for far too long. * The small steps that will significantly impact you in becoming smarter and stronger while you wait in the process. * How God has already written you win all over your story, and how to see it and say it while understanding God's purpose is always bigger than what you can think or even

The President Who Would Not Be King Aug 09 2020 Vital perspectives for the divided Trump era on what the Constitution's framers intended when they defined the extent—and limits—of presidential power One of the most vexing questions for the framers of the Constitution was how to create a vigorous and independent executive without making him king. In today's divided public square, presidential power has never been more contested. *The President Who Would Not Be King* cuts through the partisan rancor to reveal what the Constitution really tells us about the powers of the president. Michael McConnell provides a comprehensive account of the drafting of presidential powers. Because the framers met behind closed doors and left no records of their deliberations, close attention must be given to their successive drafts. McConnell shows how the framers worked from a mental list of the powers of the British monarch, and consciously decided which powers to strip from the presidency to avoid tyranny. He examines each of these powers in turn, explaining how they were understood at the time of the founding, and goes on to provide a framework for evaluating separation of powers claims, distinguishing between powers that are subject to congressional control and those in which the president has full discretion. Based on the Tanner Lectures at Princeton University, *The President Who Would Not Be King* restores the original vision of the framers, showing how the Constitution restrains the excesses of an imperial presidency while empowering the executive to govern effectively.
