Together, they provide plenty of useful advice for both new and experienced cat owners.**

**Operating Manual for Spaceship Earth Jan 01 2020 One of Fuller's most popular works, Operating Manual for Spaceship Earth, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future. Description by Lars Muller Publishers, courtesy of The Estate of Buckminster Fuller**

**The Startup Owner's Manual May 05 2020 More than 100,000 entrepreneurs rely on this book. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:**

- Avoid the 9 deadly sins that destroy startups' chances for success**
- Use the Customer Development method to bring your business idea to life**
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses**
- Identify your customers and determine how to "get, keep and grow" customers profitably**
- Compute how you'll drive your startup to repeatable, scalable profits.**

Professors: Order your exam copy today by clicking on the &BAD:"Request an Exam Copy&BAD:" link above. Would you teach someone to play basketball using just chalkboard diagrams? Or would you get them on the court and have them play? In basketball, the answer is easy&BAD:—you do both. So why teach politics only as a spectator sport? Senator Bob Graham believes that students should expand on their classroom learning about the political system:**

**he spurs them to hit the court and actually play the game. If students work on an issue they care about, politics will become a meaningful and positive experience. This short, how-to guide takes students out of theoretical discussions of policy and into a world where they can affect change. Graham&BAD:'s goal is to have students identify a problem, and then walk them through each step from researching the issue, to getting others involved, to engaging the media. Each chapter starts with a real case, showing citizens tackling a step in the process, and ends with a summary checklist and a series of questions that help students put Graham&BAD:'s game plan in action. By offering students concrete guidance, an array of resources, and advice for troubleshooting and overcoming barriers, this compact user&BAD:'s guide gets students way beyond textbook learning. Thirty-five years ago, as a member of the Florida Legislature, Bob Graham took on the challenge of civic education for eighteen weeks at a Miami-area high school. His time as both a governor and a senator has only strengthened his resolve to pique students&BAD:' curiosity about politics and teach them to get what they want from government.**

**Global Mobile Satellite Communications Theory Jan 31 2020 This book discusses current theory regarding global mobile satellite communications (GMSC) for maritime, land (road and rail), and aeronautical applications. It covers how these can enable connections between moving objects such as ships, road and rail vehicles and aircrafts on one hand, and on the other ground telecommunications subscribers through the medium of communications satellites, ground earth stations, Terrestrial Telecommunication Networks (TTN), Internet Service Providers (ISP) and other wireless and landline telecommunications providers. This new edition covers new developments and initiatives that have resulted in land and aeronautical applications and the introduction of new satellite constellations in non-geostationary orbits and projects of new hybrid satellite constellations. The book presents current GMSC trends, mobile system concepts and network architecture using a simple mode of style with understandable technical information, characteristics, graphics, illustrations and mathematics equations. The first edition of Global Mobile Satellite Communications (Springer, 2005) was split into two books for the second edition—one on applications and one on theory. This book presents global mobile satellite communications theory.**

***Ockham's Razors Aug 27 2019 Ockham's razor, the principle of parsimony, states that simpler theories are better than theories that are more complex. It has a history dating back to Aristotle and it plays an important role in current physics, biology, and psychology. The razor also gets used outside of science - in everyday life and in philosophy. This book evaluates the principle and discusses its many applications. Fascinating examples from different domains provide a rich basis for contemplating the principle's promises and perils. It is obvious that simpler theories are beautiful and easy to understand; the hard problem is to figure out why the simplicity of a theory should be relevant to saying what the world is like. In this book, the ABCs of probability theory are succinctly developed and put to work to describe two 'parsimony paradigms' within which this problem can be solved.***
