Sound Learning With Phonics Jun 25 2019 What are Phonics? Phonics is a way of teaching children to read by learning and identifying the sounds of different letters and combinations of letters. Children are taught how to: 1. recognize the sounds that each individual letter makes; 2. identify the sounds that different combinations of letters make, such as 'th' or 'ee'; 3. blend these sounds together from left to right to make a word. Children can then use this knowledge to 'de-code' new words that they hear or see. This is the first important step in learning how to read. Why Phonics? Research shows that when phonics is taught in a structured way - starting with the easiest sounds and progressing through to the most complex - it is the most effective way of teaching young children to read. Almost all children who receive a thorough introduction to phonics will have the skills they need to when they encounter new words. They can then go on to read different types of text fluently, confidently, and without fear. What are 'pseudo- words'? The content contains a mix of real words and 'pseudo-words' (or 'nonsense-words'). Non-words such as 'fap' are important to include because they are new to all children. Children cannot read non-words by using their memory or vocabulary; they have to use their decoding skills. This improves their phonic ability. *The Sound Learning Series*: We strongly believe that every child loves to learn. Therefore, we focus on encouraging that love and nurturing the children's natural curiosity by offering increasingly more engaging and rewarding content.

Reading, contrary to what you have been told, is easy to teach someone because all you have to do is teach the student to SOUND OUT the words they need to read. At first they sound the words out aloud, later they do it in their head silently. That is ALL there is to teaching reading. MOM get this: All 128 Lessons in Alpha-Phonics are covered in ONLY

14 pages of instructions for you. (See SAMPLE PAGES above) Students begin with short vowels putting together simple words (Like a with m = am or a with s = as) and progress to the more advanced words. With Alpha-Phonics the beginner can be reading simple sentences by lesson three, and that can even be on the first day! Other programs try to do too much. They inject grammar, pictures and other material, needlessly complicating the task. Alpha-Phonics just teaches reading only. Some can learn to read in only months. Alpha-Phonics works very well for older students, even grown adults who need remediation. NOW you get the benefit of Full money-back guarantee and 24/7 Helpline. Is there a negative about Alpha-Phonics? Yes. In the past 30 years we have heard only one criticism (Only a few times). It is: Some Moms say they think their child can become bored when taught by Alpha-Phonics. Why? Parents have been convinced that learning has to be fun. They believe games, card decks, cartoons/pictures, spin the needle tricks, etc. make it fun. They feel they have to entertain kids while teaching. But this slows down the process. With Alpha-Phonics the student can actually be READING simple sentences even day ONE! Students do see lists of words in Alpha-Phonics lessons, but they quickly are READING those words; they are accomplishing, not being entertained. The Bells and Whistles in other programs slow the process and cost time and money \$\$\$. The Student's huge sense of success in actually reading quickly overcomes any short-lived boredom. We almost forgot the SUPER BONUS: Many ADULTS become BETTER readers while teaching their child! Amazon also has available a set of practice Readers and a practice Phonics Workbook to accompany Alpha-Phonics.
