Vehicle Accident Analysis and Reconstruction

Methods May 27 2022

Designed for the experienced practitioner, this new book aims to help reconstruction specialists with problems they may encounter in everyday analysis. The authors demonstrate how to take the physics behind accidents out of

the idealized world and into practical situations. Real-world examples are used to illustrate the methods, clarify important concepts, and provide practical applications to those working in the field. Thoroughly revised, this new edition builds on the original exploration of accident analysis, reconstruction, and vehicle design. Enhanced with new

amusing car-related trivia and
miscellany." —Detroit News
Did you know that after James
Dean's death behind the wheel
of his Porsche 550 Spyder,
parts of the car were sold off,
and said parts then cursed
their new owners? (Or did
they?) Did you know Bonnie
and Clyde stole Ford V-8s
almost exclusively as getaway
cars because they were the
fastest cars of their day—and
that Clyde wrote Henry Ford a
thank-you note? Did you know
that a monkey by the name of
Jocko Flocko once won a Grand
National race? (NASCAR Hall

of Fame driver Tim Flock
helped.) Rumors, myths, and
fantastic stories have swirled
around the automobile for over
a century. This fascinating
collection compiles funny
stories and a trunkful of trivia:
What was the first car to break
the sound barrier? Who won
the first Indy 500? What kind of
car was dancer Isadora Duncan
in when she was killed? What
car performed the most
spectacular stunt in the James
Bond movie oeuvre? In all of
these cases, the answers may
not be what you think.

through the first six months of 1997. The primary analysis compares the fatality risk for back seat outboard belted occupants (lap or lap/shoulder belted) to the corresponding risk for unbelted occupants, as well as the fatality risk for lap/shoulder belted occupants to the risk for lap belted occupants. Fatality risk is the ratio of fatalities in the back seat to fatalities in the front seat (a control group). This procedure of comparing a subject group to a control group is called "double pair comparison." The principal conclusions are: back seat lap belts are 32 percent effective in reducing fatalities and lap/shoulder belts are 44 percent effective in reducing fatalities when compared to unrestrained back seat occupants in passenger cars. In passenger vans and sport utility vehicles, lap belts are 63 percent effective and lap/shoulder belts are 73 percent effective. The change from lap to lap/shoulder belts has significantly enhanced occupant protection, especially

in frontal crashes. In all crashes, lap/shoulder belts are 15 percent more effective than lap belts alone. In frontal crashes, lap/shoulder belts are 25 percent more effective than lap belts alone. Back seat lap belts reduce the risk of head injuries while increasing the risk of abdominal injuries in potentially fatal frontal crashes. Lap/shoulder belts reduce the risk of both head and abdominal injuries in potentially fatal frontal crashes relative to lap belts only: head injuries by 47 percent and abdominal injuries by 52 percent.

The Yugo Nov 08 2020 Six months after its American introduction in 1985, the Yugo was a punch line; within a year,

it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends.

Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State
