Age in the Workplace Jun 28 2022 The workforce across industrialized nations has become both older and more age-diverse, and this trend is expected to continue in the coming decades. These changes will have important implications for motivating and managing both individual employees and teams and because people are retiring later, it is important to address ways to sustain the wellbeing and productivity of workers. With a specifically international focus, this volume addresses these critical issues from the individual and psychological perspectives. Based primarily in empirical

research, it covers a wide range of topics related to the aging workforce, including the motivation of older workers – to work and to retire; what organizations can do to attract and retain the talent of older workers; how to improve relations and productivity among age-diverse teams; how to design jobs to support older and younger talent; and how to better understand why older workers may choose to return to work. This volume includes contributions from the top psychological researchers in the field of the aging workforce. This book was originally published as a special issue of the European Journal of Work and Organizational Psychology.

Social Work for the Twenty-first Century Jan 30 2020 Pardeck and Yuen challenge the status quo of the social work profession and call for changes in five major areas.

Organizational Legitimacy Apr 02 2020 This volume explores organizational legitimacy in business, featuring examples from a variety of industries around the world. Synthesizing the most current theoretical insights and best practices, the contributing authors examine the ways in which organizational legitimacy can be understood, its perceived influence on the market, and the relationship between organizational legitimacy and overall organizational success. The authors draw from different methodological perspectives to develop a holistic approach to organizational legitimacy that transcends the traditional concepts of corporate reputation, business ethics or corporate social responsibility. Historically, efforts to understand how organizations acquire, manage and use legitimacy have applied insights from institutional theory, resource dependence theory, organizational ecology and stakeholder theory, but the field has remained fragmented, despite the profound implications of achieving legitimacy for ensuring organizational stability, survival and sustainability through access to capital, resources and business opportunities, as well as problem solving, performance measurement and stakeholder support. Presenting case studies of successful initiatives, the book addresses:

- How organizational legitimacy is defined and measured
- How organizations achieve legitimacy and how they acquire resources
- How different stakeholders (e.g., consumers, investors, employees) make legitimacy judgments and resource allocation decisions
- Whether audiences in the same socio-cultural context arrive at shared legitimacy judgments with regard to a focal organization

Challenges and Opportunities for the Global Implementation of E-Learning Frameworks Sep 19 2021

As schools continue to explore the transition from traditional education to teaching and learning

online, new instructional design frameworks are needed that can support with the development of e-learning content. The e-learning frameworks examined within this book have eight dimensions: (1) institutional, (2) pedagogical, (3) technological, (4) interface design, (5) evaluation, (6) management, (7) resource support, and (8) ethical. Each of these dimensions contains a group of concerns or issues that need to be examined to assess and develop an institutions e-capability in order to introduce the best e-learning practices. Challenges and Opportunities for the Global Implementation of E-Learning Frameworks presents global perspectives on the latest best practices and success stories of institutions that were able to effectively implement e-learning frameworks. An e-learning framework is used as a guide to examine e-learning practices in countries around the globe to reflect on opportunities and challenges for implementing quality learning. In this book, therefore, tips for success factors and issues relevant to failures will be presented along with an analysis of similarities and differences between several countries and educational lessons. While highlighting topics such as course design and development, ICT use in the classroom, and e-learning for different subjects, this book is ideal for university leaders, practitioners in e-learning, continuing education institutions, government agencies, course developers, in-service and preservice teachers, administrators, practitioners, stakeholders, researchers, academicians, and students seeking knowledge on how e-learning frameworks are being implemented across the globe.

Challenges and Opportunities for the Obama Administration in Central Asia Dec 11 2020 President Obama has outlined a comprehensive strategy for the war in Afghanistan which is now the central front of our campaign against Islamic terrorism. The strategy strongly connects our prosecution of that war to our policy in Pakistan and internal developments there as a necessary condition of victory. But the strategy has also provided for a new logistics road through Central Asia. The author

argues that a winning strategy in Afghanistan depends as well upon the systematic leveraging of the opportunity provided by that road and a new coordinated nonmilitary approach to Central Asia. That approach would rely heavily on improved coordination at home and the more effective leveraging of our superior economic power in Central Asia to help stabilize the region so that it provides a secure rear to Afghanistan. In this fashion we would help Central Asia meet the challenges of extremism, of economic decline due to the global economic crisis, and thus help provide political stability in states that are likely to be challenged by the confluence of those trends.

Media Management Matters Mar 26 2022 Media Management Matters seeks to contribute to the for consolidation and aims to point to the practical value of media management research. The mission of media management as a discipline is not only to contribute to a better understanding of how media businesses operate and what contextual factors are driving transformation, but it also aims to assist its key stakeholders in facing this transformation: media businesses, policymakers and educators. In addition to advancing media management as an scholarly discipline, the proposed book seeks to question, investigate and discuss the practical value of the research undertaken. The book introduces and discusses relevant issues that are important for the stakeholders of media management research and discusses best-case examples of cooperation between researchers, media businesses and policymakers as well as pitfalls and learning outcomes of such cooperation.

Media Management Matters Jun 24 2019 This edited volume explores media management as engaged scholarship, building a bridge between theory and practice and discussing research collaboration between academia, policymakers and the media industry. In addition to advancing the scholarly discipline, it also questions, investigates and discusses the practical value of the research undertaken, showing how media management research can provide actionable, practice-relevant

knowledge to decision makers throughout the media industry. The volume is broken into two parts: a section reflecting on the need for collaboration between research and practice, and a section overviewing specific projects that aim to deliver administrative value to stakeholders. The international research projects presented here span topics such as digital transformation, business models in news and digital journalism, media entrepreneurship and start-ups, ad-blocking, location-based services, audiovisual consumption preferences, the sustainability of small television markets, co-located and clustered industries and digital privacy. Incorporating under-used methodological approaches, such as action research and ethnography, *Media Management Matters* brings suggestions for how scholarship might be promoted outside academia. Simply put, this book aims to demonstrate why media management matters. Featuring an international roster of contributors, this collection is essential reading for scholars and practitioners of media management, business and policy.

The Future of Doctoral Research Jan 24 2022 This book explores the future of doctoral research and what it means to be involved in all stages of the process, providing international insights into what's changing, why it's changing and how to work best with these changes. It looks at the key issues that have been thrown into sharp relief by crises such as world pandemics. Drawing on work from outstanding authors, this book shows the ways in which the doctoral process has altered the supervisor/supervisee model, the challenges that now need to be managed and demonstrates the importance of aligning all the stakeholders, systems and processes to ensure a successful future for doctoral education. Bringing together a range of perspectives, innovative practices and rigorous

research this book tackles topics such as: how doctoral research changes in keeping with the global expansion and transformation of doctoral education programs the significant influence funding bodies - be they charities, governments, businesses, or non-governmental agencies - can have on doctoral research the extent to which doctoral research penetrates daily life and vice versa, and how to encourage and embed an ethical approach to research, as well as university responses to external challenges Uniquely international and bringing together the many stakeholders in the research business, this book is essential reading for all doctoral supervisors, candidates, and anyone involved in designing or organising research programmes for early career researchers and doctoral students.

Housing for Degrowth Oct 09 2020 'Degrowth', a type of 'postgrowth', is becoming a strong political, practical and cultural movement for downscaling and transforming societies beyond capitalist growth and non-capitalist productivism to achieve global sustainability and satisfy everyone's basic needs. This groundbreaking collection on housing for degrowth addresses key challenges of unaffordable, unsustainable and anti-social housing today, including going beyond struggles for a 'right to the city' to a 'right to metabolism', advocating refurbishment versus demolition, and revealing controversies within the degrowth movement on urbanisation, decentralisation and open localism. International case studies show how housing for degrowth is based on sufficiency and conviviality, living a 'one planet lifestyle' with a common ecological footprint. This book explores environmental, cultural and economic housing and planning issues from interdisciplinary perspectives such as urbanism, ecological economics, environmental justice, housing studies and policy, planning studies and policy, sustainability studies, political ecology, social change and degrowth. It will appeal to students and scholars across a wide range of disciplines.

Museums and Higher Education Working Together Dec 23 2021 Over the last twenty years the educational role of the museum has come to be central to its mission. There are now far more educational opportunities, new spaces, new interfaces - both digital and physical, and a growing number of education and interpretation departments, educational curators and public engagement programmes. Despite these developments, however, higher education has remained a marginal collaborator compared to primary and secondary schools and to other forms of adult learning. This has meant that the possibilities for partnerships between universities, colleges, museums and galleries has remained relatively unexplored, especially in relation to their potential for generating innovative patterns of research and learning. This book addresses the key issues which are preventing such partnerships and examines how to enable more effective and creative connections between museums and higher education. The authors identify conceptual and practical barriers and explore whether current academic models are fit for purpose. They argue that as pressures mount on public educational resources around the world, there needs to be an urgent increase in the exchange of knowledge across these sectors and the forging of world-class scholarly partnerships. Examples of research undertaken internationally offer best practice models for collaboration and integration. This book will be compulsory reading for museum and educational specialists and those interested in engaging in museum/higher education partnerships. It will also be of interest to those involved in policy and decision-making in education, the museum sector and national and local government.

Public Health in Developing Countries Nov 21 2021 Public health entails the use of models, technologies, experience and evidence derived through consumer participation, translational

research and population sciences to protect and improve the health of the population. Enhancing public health is of significant importance to the development of a nation, particularly for developing countries where the health care system is underdeveloped, fragile or vulnerable. This book examines progress and challenges with regards to public health in developing countries in two parts: Part 1 “General and Crosscutting Issues in Public Health and Case Studies” and Part 2 “Country-Specific Issues in Public Health.” For example, assuring equity for marginalized indigenous groups and other key populations entails the application of transdisciplinary interventions including legislation, advocacy, financing, empowerment and de-stigmatization. The diverse structural, political, economic, technological, geographical and social landscape of developing countries translates to unique public health challenges, infrastructure and implementation trajectories in addressing issues such as vector-borne diseases and intimate partner violence. This volume will be of interest to researchers, health ministry policy makers, public health professionals and non-governmental organizations whose work entails collaborations with public health systems of developing nations and regions.

How Non-Permanent Workers Learn and Develop Feb 22 2022 How Non-Permanent Workers Learn and Develop is an empirically based exploration of the challenges and opportunities non-permanent workers face in accessing quality work, learning, developing occupational identities and striving for sustainable working lives. Based on a study of 100 non-permanent workers in Singapore, it offers a model to guide thinking about workers’ learning and development in terms of an ‘integrated practice’ of craft, entrepreneurial and personal learning-to-learn skills. The book considers how strategies for continuing education and training can better fit with the realities of non-permanent work. Through its use of case studies, the book exams the significance of non-permanent work and

its rise as a global phenomenon. It considers the reality of being a non-permanent worker and reactions to learning opportunities for these individuals. The book draws these aspects together to present a conceptual frame of 'integrated practices', challenging educational institutions and training providers to design and deliver learning and the enacted curriculum not as separate pieces of a puzzle, but as an integrated whole. With conclusions that have wider salience for public policy responses to the rise of non-permanent work, this book will be of great interest to academics and researchers in the fields of adult education, educational policy and lifelong learning.

Energy in Africa Jul 06 2020 This open access book presents a picture of the current energy challenges on the African continent (and the Sub-Saharan region in particular) and proposes pathways to an accelerated energy transition. Starting with an analysis of the status quo and the outlook for Africa's energy demand and energy access, it provides an account of the available resources, including hydrocarbons and renewable energy resources, which are playing an increasingly crucial role. It then moves on to analyze the level of investment required to scale-up Africa's energy systems, shedding light on the key barriers and elaborating on potential solutions. It also provides a suggestion for improving the effectiveness of EU-Africa cooperation. While mainly intended for policymakers and academics, this book also speaks to a broader audience interested in gaining an overview of the challenges and opportunities of the African energy sector today and in the future.

Challenges, Opportunities and Innovations in Social Work Field Education Oct 01 2022 This book collates and analyses the current research, debates, opportunities and practices in social work field education into one volume and contextualises this material within the broader context of social work. Current concerns about risk and uncertainty in field education are explored from multiple stakeholder perspectives. Social work field education is an integral component of social work education, yet its sustainability is increasingly challenged. Issue such as finding enough quality placements with accredited social workers, curriculum development, student diversity, and placement assessment of learning are being examined by researchers and practitioners alike. This represents a challenge for the social work profession generally. By drawing on traditional and alternative pedagogical perspectives on field education and constructions of risk and uncertainty evident in current discourse, the book presents innovative responses to existing challenges. Providing a reference point for future knowledge building in sustainable field education pedagogy and practice, this book will interest university field education programs and industry field educators internationally.

Teaching: Dilemmas, Challenges & Opportunities Nov 02 2022 "We have not sought in this book, to define 'best practice' for you, but have rather, challenged you to think about ways in which to teach intelligently, insightfully and respectfully." - How does a teacher deal with a student's challenging behaviour in the classroom? - Is it fair to adopt information and communication technologies that favour students who have access to sophisticated devices such as tablets in their own home? - How, during the professional experience, is an education student to act when his or her beliefs about learning are not congruent with those of the supervising teacher? - Should students be grouped in terms of their ability? These and many more issues arise daily in our early childhood, primary and secondary learning environments. Teaching, 6e takes a holistic approach to classroom teaching and learning. It considers the complexities and opportunities embedded in meeting learners' needs in diverse and ever-changing contexts. It encourages pre-service teachers to become active learners of teaching, how to think like teachers and to consider the fundamental aspects of teaching. It directs pre-service teachers to useful teaching resources, in text, in references and online. Case studies and reflection opportunities encourage pre-service teachers to consider their own strengths and issues, the diversity of learning styles in their students, their school and wider community as well as government and ethical requirements. It raises student awareness of what it really means to teach and how they can do it. Students will continue to refer to this well-researched and easy-to-use text throughout their qualification, in their professional placement and into their

teaching career.
