**Dogs at the Perimeter** Jul 18 2021 "Remember this night," he said. "Mark it in your memories because tomorrow everything changes." One starless night, a girl's childhood was swept away by the terrors of the Khmer Rouge. Exiled from the city, she and her family were forced to live out in the open under constant surveillance. Each night, people were taken away. Caught up in a political storm which brought starvation to millions, tore families apart, and changed the world forever, she lost everyone she loved. Three decades later, Janie's life in Montreal is unravelling. Haunted by her past, she has abandoned her husband and son and taken refuge in the home of her friend, the brilliant, troubled scientist, Hiroji Matsui. In 1970, Hiroji's brother, James, travelled to Cambodia and fell in love. Five years later, the Khmer Rouge came to power, and James vanished. Brought together by the losses they endured, Janie and Hiroji had found solace in each another. And then, one strange day, Hiroji disappeared. Engulfed by the memories she thought she had fled, Janie must struggle to find grace in a world overshadowed by the sorrows of her past. Beautifully realized, deeply affecting, *Dogs at the Perimeter* evokes totalitarianism through the eyes of a little girl and draws a remarkable map of the mind's battle with memory, loss, and the horrors of war. It confirms Madeleine Thien as one of the most gifted and powerful novelists writing today.

Letters to Gwen John Oct 28 2019 With original artworks throughout, an extraordinary fusion of memoir and artistic biography from the acclaimed artist and author of *Self-Portrait*. Dearest Gwen, I know this letter to you is an artifice. I know you are dead and that I'm alive and that no usual communication is possible between us but, as my mother used to say, "Time is a strange substance" and who knows really, with our time-bound comprehension of the world, whether there might be some channel by which we can speak to each other, if we only knew how. Celia Paul's *Letters to Gwen John* centers on a series of letters addressed to the Welsh painter Gwen John (1876–1939), who has long been a tutelary spirit for Paul. John spent much of her life in France, making art on her own terms and, like Paul, painting mostly women. John's reputation was overshadowed during her lifetime by her brother, Augustus John, and her lover Auguste Rodin. Through the epistolary form, Paul draws fruitful comparisons between John's life and her own: their shared resolve to protect the sources of their creativity, their fierce commitment to painting, and the ways in which their associations with older male artists affected the public's reception of their work. *Letters to Gwen John* is at once an intimate correspondence, an illuminating portrait of two painters (including full-color plates

of both artists' work), and a writer/artist's daybook, describing Paul's first exhibitions in America, her search for new forms, her husband's diagnosis of cancer, and the onset of the global pandemic. Paul, who first revealed her talents as a writer with her memoir, *Self-Portrait*, enters with courage and resolve into new unguarded territory—the artist at present—and the work required to make art out of the turbulence of life.

**The London Journal, 1845-83** Aug 31 2022 This book is the first full-length study of one of the most widely read publications of nineteenth-century Britain, the *London Journal*, over a period when mass-market reading in a modern sense was born. Treating the magazine as a case study, the book maps the Victorian mass-market periodical in general and provides both new bibliographical and theoretical knowledge of this area. Andrew King argues the necessity for an interdisciplinary vision that recognises that periodicals are commodities that occupy specific but constantly unstable places in a dynamic cultural field. He elaborates the sociological work of Pierre Bourdieu to suggest a model of cultural 'zones' where complex issues of power are negotiated through both conscious and unconscious strategies of legitimation and assumption by consumers and producers. He also critically engages with cultural theory as well as traditional scholarship in history, art history, and literature, combining a political economic approach to the commodity with an aesthetic appreciation of the commodity as fetish. Previous commentators have coded the mass market as somehow always 'feminine', and King offers a genealogy of how such a gender identity came about. Fundamentally, however, the author relies on new and extensive primary research to ground the changing ways in which the reading public became consumers of literary commodities on a scale never before seen. Finally, King recontextualizes within the Victorian mass market three key novels of the time - Walter Scott's *Ivanhoe* (serialised in the *London Journal* 1859-60), Mary Braddon's *Lady Audley's Secret* (1863), and a previously unknown version of Émile Zola's *The Ladies' Paradise* (1883) - and in so doing he lends them radically new and unexpected meanings.

*The Last Train to London* May 04 2020 National bestseller A Historical Novels Review Editors' Choice A Jewish Book Award Finalist The New York Times bestselling author of *Beautiful Exiles* conjures her best novel yet, a pre-World War II-era story with the emotional resonance of *Orphan Train* and *All the Light We Cannot See*, centering on the Kindertransports that carried thousands of children out of Nazi-occupied Europe—and one brave woman who helped them escape to safety. In 1936, the Nazis are little more than loud, brutish bores to fifteen-year old Stephan Neuman, the son of a wealthy and influential Jewish family and budding playwright whose playground extends from Vienna's streets to its intricate underground tunnels. Stephan's best friend and companion is the brilliant Žofie-Helene, a Christian girl whose mother edits a progressive, anti-Nazi newspaper. But the two adolescents' carefree innocence is shattered when the Nazis' take control. There is hope in the darkness, though. Truus Wijsmuller, a member of the Dutch resistance, risks her life smuggling Jewish children out of Nazi Germany to the nations that will take them. It is a mission that becomes even more dangerous after the Anschluss—Hitler's annexation of Austria—as, across Europe, countries close their borders to the growing number of refugees desperate to escape. Tante Truus, as she is known, is determined to save as many children as she can. After Britain passes a measure to take in at-risk child refugees from the German Reich, she dares to approach Adolf Eichmann, the man who would later help devise the “Final Solution to the Jewish Question,” in a race against time to bring children like Stephan, his young brother Walter, and Žofie-Helene on a perilous journey to an uncertain future abroad.

**The Art of Failure** Apr 02 2020 An exploration of why we play video games despite the fact that we are almost certain to feel unhappy when we fail at them. We may think of video games as being "fun," but in *The Art of Failure*, Jesper Juul claims that this is almost entirely mistaken. When we play video games, our facial expressions are rarely those of happiness or bliss. Instead, we frown, grimace, and shout in frustration as we lose, or die, or fail to advance to the next level. Humans may have a fundamental desire to succeed and feel competent, but game players choose to engage in an activity in which they are nearly certain to fail and feel incompetent. So why do we play video games even though they make us unhappy? Juul examines this paradox. In video games, as in tragic works of art, literature, theater, and cinema, it seems that we want to experience unpleasantness even if we also dislike it. Reader or audience reaction to tragedy is often explained as catharsis, as a purging of negative emotions. But, Juul points out, this doesn't seem to be the case for video game players. Games do not purge us of unpleasant emotions; they produce them in the first place. What, then, does failure in video game playing do? Juul argues that failure in a game is unique in that when you fail in a game, you (not a character) are in some way inadequate. Yet games also motivate us to play more, in order to escape that inadequacy, and the feeling of escaping failure (often by improving skills) is a central enjoyment of games. Games, writes Juul, are the art of failure: the singular art form that sets us up for failure and allows us to experience it and experiment with it. *The Art of Failure* is essential reading for anyone interested in video games, whether as entertainment, art, or education.

Merpeople Jun 16 2021 People have been fascinated by merpeople and merfolk since ancient times. From the sirens of Homer's *Odyssey* to Hans Christian Andersen's *The Little Mermaid* and the film *Splash*, myths, stories, and legends of half-human, half-fish creatures abound. In modern times “mermaiding” has gained popularity among cosplayers throughout the world. In *Merpeople: A Human History*, Vaughn Scribner traces the long history of mermaids and mermen, taking in a wide variety of sources and using 117 striking images. From film to philosophy, church halls to coffee houses, ancient myth to modern science, Scribner shows that mermaids and tritons are—and always have been—everywhere.

**The London and Edinburgh Philosophical Magazine and Journal of Science, Vol. 13** Mar 02 2020 Excerpt from The London and Edinburgh Philosophical Magazine and Journal of Science, Vol. 13: New and United Series of the Philosophical Magazine, Annals of Philosophy, and Journal of Science; July December, 1838 It has long been a subject of regret that no institution existed in England in which young men might receive an education which should peculiarly fit them for the higher branches of the profession of a Civil Engineer. That profession is comparatively of recent origin. It has been formed by the exigencies of the times, and has had to struggle with great disadvantages. The names of Smeaton, Brindley, and others recall to our minds the difficulties which those men of masterly abilities had to encounter, in order to devise the means and create the instruments necessary to accomplish the purposes which their genius conceived. A portion of this difficulty still subsists; while the attainments necessary to enable the engineer to meet the emergencies which he has to encounter, have continually become more varied and extensive. The construction of canals, harbours and railroads, the successful application of steam to the purposes of navigation and of locomotive engines on land, the increased activity in opening out the treasures of coal and other minerals, in situations hitherto deemed inaccessible, have combined to offer a field of almost boundless extent for the exercise of talent of the highest order. In the meanwhile the profession of civil engineer has risen in the scale of national importance, in consequence of the immense capital employed under his direction. **London Journal 1762-1763** Jun 28 2022 Edinburgh-born James Boswell, at twenty-two, kept a daily diary of his eventful second stay in London from 1762 to 1763. This journal, not discovered for more than 150 years, is a deft, frank and artful record of adventures ranging from his vividly recounted love affair with a Covent Garden actress to his first amusingly bruising meeting with Samuel Johnson, to whom Boswell would later become both friend and biographer. The London Journal 1762-63 is a witty, incisive and compellingly candid testament to Boswell's prolific talents.
