Brian's Hunt Oct 12 2020 Brian sets out on the hunt of a lifetime in this follow-up to the award-winning classic *Hatchet* from three-time Newbery Honor-winning author Gary Paulsen! Brian Robeson has stood up to the challenge of surviving the wilderness in *Hatchet*, *The River*, *Brian's*

Winter, and Brian's Return. Now, while camping alone on a lake in the woods, he finds a wounded and whimpering dog. As Brian treats her wounds, he worries about who or what did this to her. His instincts tell him to head north, quickly, to check on his Cree friends. With his new companion at his side, he sets out on the hunt. Gary Paulsen expertly delivers a riveting story that brilliantly combines two of his great themes: the human animal's place in nature, and the mysterious and wonderful bond between humans and dogs. “The Brian books reveal nature and humankind’s place in it with spare prose that seems ideally suited to the setting and plot.” —VOYA “Based on real incidents, this well-written sequel to Hatchet and its successors will be gobbled up by the author’s legions of fans.” —Kirkus Reviews Read all the Hatchet Adventures! Pub 1310 Nov 12 2020 The 2001 edition of Pub. 1310 Radar Navigation and Maneuvering Board Manual combines selected chapters from the sixth edition of Pub. 1310, Radar Navigation Manual, and the fourth edition of Pub. 217, Maneuvering Board Manual. This manual has been compiled by the editorial staff of the Maritime Safety Information Center at the National Imagery and Mapping Agency. It is intended to be used primarily as a manual of instruction in navigation schools and by naval and merchant marine personnel. By combining the previous editions of Pub. 1310 and Pub. 217 into one book we hope that we have provided a practical reference for mariners on board ship and instructors ashore. It is also intended to be of assistance to others who are concerned with marine radar in different and less direct ways. In combining the two manuals, every effort has been made to retain

the original style and format which has proven to be clear and helpful to the maritime community. Most of the illustrations and examples have been carried forward into this edition. The chapter on ARPA has been expanded and now includes a sample operating manual for a modern commercial radar and ARPA. Many excellent other publications on ARPA are available and should be consulted for a more thorough understanding on this subject matter. Book of the Little Axe Jul 21 2021 This “masterful epic” spans decades and oceans from Trinidad to the American frontier during the tumultuous days of westward expansion (Publishers Weekly). Trinidad, 1796. Young Rosa Rendón quietly rebels against the life others expect her to lead. Bright, competitive, and opinionated, she does not intend to cook and keep house, for it is obvious her talents lie in running the farm she views as her birthright. But when her homeland changes from Spanish to British rule, the fate of free black property owners—Rosa’s family among them—is suddenly jeopardized. By 1830, Rosa is living among the Crow Nation in Bighorn, Montana, with her children and her husband, Edward Rose, a Crow chief. Her son Victor is of the age where he must seek his vision and become a man. But his path forward is blocked by secrets Rosa has kept from him. So Rosa must take him to where his story began and, in turn, retrace her own roots. Along the way, she must

acknowledge the painful events that forced her from the middle of an ocean to the rugged terrain of a far-away land. A Booklist Editor's Choice Book of the Year

Violence in Colombia Jun 27 2019 Colombia, one of South America's oldest, middle-income democracies, has developed rapidly despite a fifty year "simmering" civil war and increasing levels of urban and rural crime and violence. In the past decade, however, the scale and intensity of violence has changed from a marginal conflict to generalized violence that now dominates the daily lives of most citizens. As remote guerilla activity has turned into country-wide "war," bringing in paramilitary groups, drug cartels, and other social actors, so too the causes of violence have changed. These have included both external events such as the collapse of the Cold War, as well as internal changes relating to economic liberalization, coal and oil developments and the impact of the global trade in illicit narcotics. Violence in Colombia is highly complex not only because of the different categories, but also due to its multiple causes. This paper combines disparate existing theories to develop an integrated framework that identifies four different levels of causality: structural, institutional, interpersonal, and individual. It recognizes the mutually reinforcing role played by factors at different levels of causality. Underlying the causes of violence in Colombia is minimal state presence in many parts of the country, widespread corruption and impunity, high levels of societal acceptance of violence, and a regionally fragmented country.

Speaking of Bears Jul 29 2019 As majestic as they are dangerous, and as timeless as they are current, bears continue to captivate readers. Speaking of Bears is not your average collection of stories. Rather it is the history, compiled from interviews with over 100 individuals, of how Yosemite, Sequoia, and Kings Canyon National Parks, all in California’s Sierra Nevada, created a human-bear problem so bad that there were eventually over 2,000 incidents in a single year. It then describes the pivotal moments during which park employees used trial-and-error, conducted research, invented devices, collaborated with other parks, and found funding to get the crisis back under control. Speaking of Bears is for bear lovers, national park buffs, historians, wildlife managers, biologists, policy and grant-makers, and anyone who wants to know the who, what, where, when, and why of what once was a serious human-bear problem, and the path these parks took to correct it. Although these Sierran parks had some of the worst black bear problems in the country, hosted much of the research, and invented the bulk of the technological solutions, they were not the only ones. For that reason, intertwining stories from several other parks including Yellowstone, the Great Smoky Mountains, and Banff-Canada are included. For anyone seeking solutions to human-wildlife conflicts throughout the world, the lessons-learned are invaluable and widely applicable.
