Business Process Management Workshops
May 18 2021 This book constitutes the refereed proceedings of nine international workshops held in Beijing, China, in conjunction with the 11th International Conference on Business Process Management, BPM 2013, in August 2013. The nine workshops comprised Business Process Intelligence (BPI 2013), Business Process Management and Social Software (BPMS2 2013), Data- and Artifact-Centric BPM (DAB 2013), Decision Mining and Modeling for Business Processes (DeMiMoP 2013), Emerging Topics in Business Process Management (ETBPM 2013), Process-Aware Logistics Systems (PALS 2013), Process Model Collections: Management and Reuse (PMC-MR 2013), Security in Business Processes (SBP 2013) and Theory and Applications of Process Visualization (TAProViz 2013). The 38 revised full papers presented were carefully reviewed

and selected from 74 submissions.

Formal Methods for Components and Objects Jul 28 2019 The focus in development methodologies of large and complex software systems has switched in the last two decades from functional issues to structural issues; this holds for both the object-oriented and the more recent component-based software engineering paradigms. Formal methods have been applied successfully to the verification of medium-sized programs in protocol and hardware design for quite a long time. However, their application to the development of large systems requires more emphasis on specification, modeling and validation techniques supporting the concepts of reusability and modifiability, and their implementation in new extensions of existing programming languages like Java. This state-of-the-art survey presents the outcome of the 9th Symposium on Formal Methods for Components and Objects, held in Graz, Austria, in November/December 2010. The volume contains 20 revised contributions submitted after the symposium by speakers from each of the following European IST projects: the FP7-IST project AVANTSSAR on automated validation of trust and security of service-oriented architectures; the FP7-IST project DEPLOY on industrial deployment of advanced system engineering methods for high productivity and dependability; the ESF-COST Action IC0701 on formal verification of object-oriented software; the FP7-IST project HATS on highly adaptable and trustworthy software using formal models; the FP7-SST project INESS on an integrated European railway signalling system; the FP7-IST project MADES on a model-driven approach to improve the current practice in the development of embedded systems; the FP7-IST project MOGENTES on model-based generation of tests for dependable embedded systems; as well as the FP7-IST project MULTIFORM on integrated multi-formalism tool support for the design of networked embedded control systems.

Archaeology of modernism Mar 16 2021 Das Bauhausgebäude in Dessau, 1926 von Walter Gropius geplant, gilt heute als 'gebautes Manifest der Bauhaus-Ideen' und zählt zu den bedeutendsten Bauten der Moderne. Zusammen mit den Meisterhäusern in Dessau sowie den Bauten in Weimar wurde es 1996 in die Liste des Weltkulturerbes bei der UNESCO aufgenommen. Das Bauhaus wurde zwischen 1996 und 2006 vollständig saniert. Ziel dabei war es, den Ansprüchen der heutigen Nutzung gerecht zu werden, aber vor allem den historischen und künstlerischen Wert des Gebäudes zu bewahren und wieder sichtbar zu machen. Intentionen, Methoden und Ergebnisse werden in diesem Buch ausführlich dokumentiert. Auch die auffällige farbliche Gestaltung von Oberflächen, die entgegen der landläufigen Vorstellung von der 'weißen Moderne' gerade bei den Dessauer Bauten eine große Rolle spielte, war ein wichtiges Ergebnis der Sanierungsarbeiten.

Exploring Cultural Dynamics and Tensions Within Service-Learning Aug 28 2019 Service-learning is an exciting pedagogy and field of study, offering insight into how academic study and community engagement blend to create social change. In its most traditional conceptualization, servicelearning activities typically manifest within communities where outside individuals address a need. Service learning is purported to have a transforming effect on individual student perspectives by providing students the opportunity to interact with people and enter into situations that allow students to test their predisposition towards others. However, the literature on the impact of service-learning on participants' acceptance of diversity and development of open-mindedness reports mixed outcomes. The purpose of this book is to explore cultural tensions and dynamics within the field of service-learning. It is not meant to be an exhaustive review of the interplay between culture and service learning, but rather a starting point for an ongoing conversation about how this complex topic impacts the field. In 18 chapters, educators, students, and administrators investigate the cultural values of service-learning itself and the tensions created when this is at odds with the

values of others within K-12 and higher education in the United States and abroad. Authors include community organization representatives, researchers, directors of offices of community engagement, university administrators, junior and senior faculty, and former service-learning undergraduate students. Submissions reflect a range of genres, including theoretical / conceptual pieces, position papers, case studies, and other traditional academic essays, challenging how students and community members are affected by the cultural tensions within service-learning engagement.

Creating Powerful Brands Oct 11 2020 This has long been the one book that students can rely on to get them thinking critically and strategically about branding. This new fourth edition is no exception. THE definitive introductory textbook for this crucial topic, it is highly illustrated and comes packed with over 50 brand-new, real examples of influential marketing campaigns. Bullets: • Summarises the latest thinking and best practice in the domain of branding • All new real marketing campaigns show how branding theories are implemented in practice • Brought right up to date with a clear European and UK focus Undergraduate business and marketing students studying brand management will find this an invaluable resource in their quest to understand how branding really works.

Problematizing Service-Learning Nov 23 2021 Interest in and research on civic engagement and service-learning have increased exponentially. In this rapid growth, efforts have been made to institutionalize pedagogies of engagement across both K-12 and higher education. As a result, increased positive attention has been complemented equally by well-founded critiques complicating experiential approaches' claims and questioning if institutional, financial, and philosophical commitment is warranted. A key complaint from these critical voices is the tightly woven, protective insular core in the field of service-learning. This claim is not unfounded, nor necessarily bad. Initial efforts to legitimize service-learning and other forms of community-based education required group cohesion. The concern, however, is that the initial group cohesion has led to groupthink wherein group members have avoided critical analysis and evaluation. This book aims to prevent groupthink within the field of service-learning by allowing for the examination of effective alternatives by new voices who can serve as "critical evaluators" from within the field itself. Myriad perspectives are offered, including empirical, theoretical, practical, and community perspectives. Authors challenge preconceived notions of service-learning, who is benefited by this pedagogy, outcomes of participation and implementation, and most importantly the theoretical, conceptual, and methodological lenses through which service-learning is even considered. The book allows servicelearning's major criticisms to be examined, challenges to be voiced, and research agendas to be laid. This book parallels service-learning's presence and popularity across various disciplines/fields. Chapters are written from broad perspectives and are aimed to inform service-learning researchers and educators, community organizations, and policy makers who consider service-learning as a means to address civic responsibility. Authors expose theoretical and philosophical concerns circulating in the field, and often still occupying spaces on the fringe of discourse, action, and research. The book raises fundamental questions for undergraduate and graduate courses with social justice themes by considering the implications that pedagogies of engagement have on learners and communities.

Euro-Par 2008 Workshops - Parallel Processing Jun 18 2021 Parallel and distributed processing, although within the focus of computer science research for a long time, is gaining more and more importance in a wide spectrum of applications. These proceedings aim to demonstrate the use of parallel and distributed processing concepts in different application fields, and attempt to spark interest in novel research directions to parallel and high-performance computing research in general. The objective of these workshops is to specifically address researchers coming from university, industry and governmental research organizations and application-oriented companies in order to close the gap between purely scientific

research and the applicab- ity of the research ideas to real-life problems. Euro-Par is an annual series of international conferences dedicated to the pro- tion and advancement of all aspects of parallel and distributed computing. The 2008 event was the 14th issue of the conference. Euro-Par has for a long time been eager to attract colocated events sharing the same goal of promoting the dev- opment of parallel and distributed computing, both as an industrial technique and an academic discipline, extending the frontier of both the state of the art and the state of the practice. Since 2006, Euro-Par has been offering researchers the chance to co- cate advanced technical workshops back-to-back with the main conference.

Rule Representation, Interchange and Reasoning on the Web Dec 13 2020 The 2008 International Symposium on Rule Interchange and Applications (RuleML th 2008), collocated in Orlando, Florida, with the 11 International Business Rules - rum, was the premier place to meet and to exchange ideas from all fields of rules te- nologies. The aim of RuleML 2008 was both to present new and interesting research results and to show successfully deployed rule-based applications. This annual sym- sium is the flagship event of the Rule Markup and Modeling Initiative (RuleML). The RuleML Initiative (www.ruleml.org) is a non-profit umbrella organization of several technical groups organized by representatives from academia, industry and government working on

rule technologies and applications. Its aim is to promote the study, research and application of rules in heterogeneous distributed environments such as the Web. RuleML maintains effective links with other major international societies and acts as intermediary between various 'specialized' rule vendors, appli- tions, industrial and academic research groups, as well as standardization efforts from, for example, W3C, OMG, and OASIS.

Emerging Trends in the Evolution of Service-Oriented and Enterprise Architectures Sep 09 2020 This book presents emerging trends in the evolution of service-oriented and enterprise architectures. New architectures and methods of both business and IT are integrating services to support mobility systems, Internet of Things, Ubiquitous Computing, collaborative and adaptive business processes, Big Data, and Cloud ecosystems. They inspire current and future digital strategies and create new opportunities for the digital transformation of next digital products and services. Services Oriented Architectures (SOA) and Enterprise Architectures (EA) have emerged as a useful framework for developing interoperable, large-scale systems, typically implementing various standards, like Web Services, REST, and Microservices. Managing the adaptation and evolution of such systems presents a great challenge. Service-Oriented Architecture enables flexibility through loose coupling, both between the services themselves

and between the IT organizations that manage them. Enterprises evolve continuously by transforming and extending their services, processes and information systems. Enterprise Architectures provide a holistic blueprint to help define the structure and operation of an organization with the goal of determining how an organization can most effectively achieve its objectives. The book proposes several approaches to address the challenges of the service-oriented evolution of digital enterprise and software architectures.

Probabilistic Inductive Logic Programming Mar 04 2020 This book provides an introduction to probabilistic inductive logic programming. It places emphasis on the methods based on logic programming principles and covers formalisms and systems, implementations and applications, as well as theory.

Yamaha YFS200 Blaster ATV Apr 28 2022 With a Haynes manual, you can do it yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the ATV. We learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Our books have clear instructions and plenty of photographs that show each step. Whether you're a beginner or a pro, you can save big with Haynes! • Step-by-step procedures • Easy-to-follow photos • Comprehensive routine maintenance and fault diagnosis sections • Detailed wiring diagrams • Color spark plug diagnosis Complete coverage

for your Yamaha YFS200 Blaster ATV covering 200cc models for (1988 thru 2006): • Routine Maintenance • Tune-up procedures • Engine, clutch and transmission repair • Cooling system • Fuel and exhaust • Ignition and electrical systems • Brakes, wheels and tires • Steering, suspension and final drive • Frame and bodywork • Wiring diagrams

Current Trends in Database Technology - EDBT 2006 Oct 23 2021 This book constitutes the thoroughly refereed joint post-proceedings of nine workshops held as part of the 10th International Conference on Extending Database Technology, EDBT 2006, held in Munich, Germany in March 2006. The 70 revised full papers presented were selected from numerous submissions during two rounds of reviewing and revision.

Computer and Information Security Handbook Jan 02 2020 The second edition of this comprehensive handbook of computer and information security provides the most complete view of computer security and privacy available. It offers in-depth coverage of security theory, technology, and practice as they relate to established technologies as well as recent advances. It explores practical solutions to many security issues. Individual chapters are authored by leading experts in the field and address the immediate and long-term challenges in the authors' respective areas of expertise. The book is organized into 10 parts comprised of 70 contributed chapters by leading experts in the areas of networking and systems security, information management, cyber warfare and security, encryption technology, privacy, data storage, physical security, and a host of advanced security topics. New to this edition are chapters on intrusion detection, securing the cloud, securing web apps, ethical hacking, cyber forensics, physical security, disaster recovery, cyber attack deterrence, and more. Chapters by leaders in

the field on theory and practice of computer and information security technology, allowing the reader to develop a new level of technical expertise Comprehensive and up-to-date coverage of security issues allows the reader to remain current and fully informed from multiple viewpoints Presents methods of analysis and problem-solving techniques, enhancing the reader's grasp of the material and ability to implement practical solutions

Social Services Disrupted Feb 12 2021 This book revives the discussion on public social services and their redesign, with a focus on services relating to care and the social inclusion of vulnerable groups, providing rich information on the changes that occurred in the organisation and supply of public social services over the last thirty years in different European places and service fields. Despite the persisting variety in social service models, three shared trends emerge: public sector disengagement, 'vertical re-scaling' of authority and 'horizontal re-mix' in the supply system. The consequences of such changes are evaluated from different perspectives – governance, social and territorial cohesion, labour market, gender – and are eventually deemed 'disruptive' in both economic and social terms. The policy implications of the restructuring are also explored. This title will be Open Access on Elgaronline.com.

The Coronas-F Space Mission Dec 01 2019 This volume is the updated and extended translation of the Russian original. It presents the results of observations of solar activity and its effects in the Earth space environment carried out from July 2001 to December 2005 on board the CORONAS-F space mission. The general characteristics of the CORONAS-F scientific payload are provided with a description of the principal experiments. The main results focus on the global oscillations of the Sun (p-modes), solar corona, solar flares, solar cosmic rays, Earth's radiation belts, and upper atmosphere. The book will be welcomed by students, post-graduates, and scientists working in the field of solar and solar-terrestrial physics. This English edition is supplemented by sections presenting new results of the SPIRIT and TESIS experiments under the CORONAS solar program, as well as from the SONG experiment onboard the CORONAS-F satellite.

Service Management Apr 04 2020 "Great retailers are great at service. No exceptions. This book offers a wealth of insight into delivering excellent retail service." ---Leonard L. Berry, Distinguished Professor of Marketing, N.B Zale Chair in Retailing and Market Leadership, Mays Business School, Texas A&M University "With a growing understanding of service as a phenomenon and perspective of business and marketing, retailers are increasingly seeing the need to transform from distribution of products to service providers. This book includes considerable insight regarding the importance of the service perspective and how it can be implemented in retailing." --Christian Grönroos, Professor of Service and Relationship Marketing, CERS Centre for Relationship Marketing and Service Management, Hanken School of Economics, Finland "Consisting of chapters written by leading scholars in service management and retailing from around the world, this comprehensive book offers rich insights for how retailers can excel and achieve sustainable competitive advantage by invoking and implementing service management principles. This enlightening book is a valuable resource for students, researchers and practitioners with an interest in retailing." --A. "Parsu" Parasuraman, Professor of Marketing & The James W. McLamore Chair, School of Business Administration, University of Miami Coral Gables, Florida "Service excellence and service innovation are critical for success in today's

competitive retail marketplace. Service Management: The New Paradigm in Retailing provides a contemporary and transformative lens for accomplishing these essential goals." -- Mary Jo Bitner, Professor, Director Center for Services Leadership, W.P. Carey School of Business, Arizona State University

The Agent Modeling Language - AML Jul 08 2020 Multi-agent systems have been a focus of studies for more than 25 years. Yet, despite substantial effort of an active research community, modeling of multi-agent systems still lacks complete and proper definition, general acceptance, and practical application. This book provides the Agent-Modeling Language (AML), a comprehensive modeling language as an extension of UML 2.0, concentrating on multi-agent systems and applications.
